Notes on this Catalogue

Strikes will be regarded as dispatch usage unless otherwise noted. All covers will be regarded as regular (#8) size, unless otherwise noted.

Dates and other information such as rarity factors have been taken from the Fifth Edition (2001) of the *Squared Circle Cancellations of Canada*, a handbook of the British North America Philatelic Society Ltd. by the Squared Circle Study Group, edited by (the late) John S. Gordon. Available through Sparks Auctions, and referred to in this catalogue as “the Handbook”.

Many of the covers and cards still have their original purchase prices, as well as sometimes provenance notes in light pencil, which we have left intact.

Symbols used to denote what is included in a lot are: ⊙ = on stamp or piece, ☒ = on cover, and PC = on post card.

Squared circle postmark descriptions will be qualified as fine (partial impressions), very fine (full impressions), etc in the description of the postmark eg. “A fine strike”. We have sometimes added a qualifier such as light or very light when required. Impressions on stamp have been described as socked on the nose if well centered, or a percentage (%) if partial, and in some cases a description of the legible letters has been added. The qualifier at the end of a description (before the rarity factor) will be for the covers, post cards, stamps or lots themselves. Faults are only described if immediately obvious (such as fronts only, or large tears, etc.) as the emphasis of our descriptions is on the postmarks. Viewing is recommended.

Except in rare circumstances, we have refrained from using terms such as rare or scarce and instead use the published rarity factors (RF). Because of recent unavailability of many of these items, we believe these rarity factors to be sometimes lower than what the recent market has to offer

When counting the number of stamps in a lot, the multiples (pairs, etc) were counted as one.

A dash “-” in the RF section is used when the RF given in the handbook refers to another time mark than the one being described. For example, RF 7.5 given for Paris Ont is for time mark B only, and would not be used if a lot contains other time marks.

All other Terms and Conditions, as described on page 110 apply as usual.

The Postal History Society of Canada will soon be adding to its growing list of online postmark databases a new Squared Circle postmark database. The new information contained in this sale will be included, and the PHSC is seeking the help of collectors to add any new information not contained in the Handbook. Please contact president@postalhistorycanada.net to participate in this ground-breaking project. All information in these online postmark databases is constantly kept up to date by dedicated specialists and the collaboration of all collectors is always welcome.

Ted Kerzner

Ted Kerzner was a partner in the law firm Kerzner, MacDermid, McKillop dealing with commercial litigation and professional regulation.

Fellow stamp collectors and dealers always found Ted to be a delight; he was one of those special people you meet in the philatelic world. He was THE most important buyer and student of squared circles for all countries. While he was an extremely private individual, he was gregarious at stamp shows, sharing his incomparable knowledge, unless he was lost in considering the merits of a particular squared circle cancel. Every dealer whom he dealt with really worked at finding something special for him; you could see the delight and excitement when a new rare or interesting postmark was acquired. He was always willing to go for a coffee and chat, preferably when one had squared circles to show him...

There are many “Ted” stories. How could he justify leaving the legal practice of which he was a founder and senior partner to fly to a stamp show in New Zealand? And his explanation was really obvious, and one that only a collector could understand. Every show dealer had an envelope waiting for him, with stamps and covers saved since the last time they had crossed paths. While he was extremely serious about his profession, it was in a way really only a means to finance his hobby. He even negotiated trial dates with judges to suit the timing of major stamp shows, so many of which he attended all over the world.

A chance meeting at Crystal Beach with Allan Steinhart, who became the doyen of postal history dealers in Canada, probably began Ted’s serious philatelic life. They had gone to the same high school in Toronto, and the connection and interests led to a friendship. Ted became a fixture at Allan’s table at the St. Lawrence Hall stamp show, and every other week he would receive a new package of covers, returning the residue from the previous batch, which only then would be shown to other collectors. And the pattern was repeated in London or Sindelfingen or Amsterdam; there was always an envelope for him. It seems somehow right that both Allan and Ted ended their days at a show, doing what they loved to do.

Sparks Auctions in honoured to be chosen as the venue to carefully lot, then accurately describe, and now present at auction these top quality squared circle stamps and covers.

A post office facing slip during WWII, believed to be the only one known shows VICTORIA handstamp, the letter H in blue and a Nanaimo State II 7/JUN 6/46. 6. Buyers from Canada will be charged Federal GST or HST. Absentee bidders resident outside Canada are not liable for Canadian taxes if purchases are delivered outside of Canada. See shipping instructions.
7. Until paid for in full, all lots remain the property of Sparks on behalf of the seller.
8. The buyer assumes all risk for delivery of purchased lots and agrees to pay for prescribed shipping costs.
9. Because the descriptions and scans of the auction will be available in a printed catalogue, our website and on Stamp Auction Network, there is a chance of technical error. In that event the auctioneer's decision will be final. If discovered before the sale a notice will be posted on sparks-auctions.com. Opening bids will be available on the websites and will be updated. These are only provided as a service to bidders and Sparks does not guarantee their completeness or accuracy.
10. Any lot, the description of which is obviously incorrect, is returnable, but only if the lot is returned within 14 days of receipt. All disputed lots must be returned intact with the original packing material. The following lots may not be returned for any reason: Lots containing ten or more items; any lot described with "faults" or "defects" may not be returned because of any fault or defect. No illustrated lots may be returned because of centering, margins or other factors shown in the illustrations.
11. All lots are sold as genuine. If a prospective purchaser wishes to obtain other expert opinion from a mutually acceptable authority, an extension may be granted on a lot prior to the commencement of the auction provided that the following conditions are met; (1) the purchase price of the lot must be paid in full, (2) the item must be submitted to

the mutually acceptable expertizing committee with a properly executed application form within 14 days of the sale, (3) a copy of the application form must be given to Sparks, (4) unless prior arrangements are made, extensions are granted for a period of up to 100 days; (5) if in the opinion of the authority the lot is not genuine or was grossly misdescribed, the purchaser shall receive a full reimbursement of the purchase price plus costs of certification up to \$100, and (6) lots back stamped or marked are not returnable. It is the purchaser's responsibility not to let this happen.

About Bidding

**Please bid using these increments.
(All bids are in Canadian dollars.)**

\$5 - \$100	\$5
\$110 - \$250	\$10
\$275 - \$750	\$25
\$800 - \$1500	\$50
\$1600 - \$3100	\$100
\$3200 - \$7000	\$200
\$7500 - \$15,000	\$500
\$16,000 - \$30,000	\$1,000
\$32,000 - \$50,000	\$2,000
above \$50,000	\$5,000

1) Please bid using the increments above. All bids not conforming to these increments will be lowered to the appropriate amount.

2) You have the option to break ties or increase your bids if needed by checking the appropriate box on the bid sheet.

3) If you are bidding through the internet, after you have entered your bids you will receive a computer generated email describing each lot you bid on and telling you where you stand in terms of other bidders without divulging the high bid. You then have the option of updating your bids. If you bid by mail or fax you have the option of asking to receive this email by checking the appropriate box and including your email address.

4) If you give your bids to Stamp Auction Network, or to Sparks Auctions you will only pay one increment over the second highest bid. Your top (maximum) bid will be used only if another bid is one increment below yours, or exactly the same as your bid but was received after yours. In the event of tie bids, the earliest bid received by us will be successful. We *do not accept "buy" bids.*

5) The auctioneer may permit telephone bidding during the auction. This must be arranged well in advance of the auction starting time. Sparks reserves the right to refuse telephone bidding at any given time. Sparks will not be held responsible in the event that a telephone bidder cannot be contacted. Applicable telephone expenses will be charged to telephone bidders.

6) OPENING BIDS will be available approximately one week before the auction. (With one week to go most of these will be well below the final price). New opening bids will be updated at least daily. If you see that an opening bid is higher than you wish to bid for a lot you would like to buy, this feature allows you to focus on other lots of interest to you. Sparks will not be held responsible in the event of errors in the opening bids provided before the sale.

7) You have the option of limiting your purchases to a specified dollar figure (e.g. \$325), or to an approximate figure. This feature allows you to bid with the confidence that you will not be financially embarrassed if you are very successful in the auction. It also allows you to use a strategy of bidding just above the opening bid for many lots with the expectation of winning only a minority of these.

8) With currencies fluctuating as widely as they do it is no longer practical to offer bidding in both Canadian and U.S. dollars. However you can specify the limit of your total purchases in US funds and it will be converted to the appropriate amount on the day of the sale.

How To Bid

Advance Bidding We accept bids in the time-honoured tradition: you can mail us a printed bidsheet (available for download from our site), or fax it to us at 613-567-2972, or call us at 613-567-3336 with your bidding information. E-mail bids also work well; simply provide the lot number and your maximum bid in Canadian dollars.

For the most satisfying and realistic experience akin to being on the auction floor, you should become familiar with Live Internet Bidding.

Live Internet Bidding

Live bidding on the internet allows bidders anywhere in the world to participate in the auction. Sparks Auctions is pleased to make the auction available through Stamp Auction Network, and we will do everything we can for our customers to make the process simple, trustworthy and fun.

Connect to Stamp Auction Network at: stampauctionnetwork.com

Register once and create a user name, which will allow you to choose auction firms to bid with, including Sparks Auctions. We will approve you to bid as soon as possible during normal business hours. If your application was made more than one month ago, please re-submit.

The Approval Process

We will not extend credit terms to any buyer who has not made arrangements in advance of the auction. Payment must be made before lots are shipped, preferably by credit card, but we also accept cheques, money orders, etc. We need to confirm your account before you will be able to place bids with us. For fastest bidder confirmation, please reference Ian Kimmerly, Sparks Auctions, or other North American auction houses when you create your account. Other details that will help us

quickly approve you for bidding include:

- * Credit Card number (Visa or MC, with expiry date and CVC code)
- * Philatelic references (including eBay reputations, BidStart etc.)
- * Associations (APS, RPSC, BPA, etc.)
- * Your own professional website (stamp-related or otherwise)
- * A valid e-mail address (we will not approve you if your e-mail bounces)
- * Call us at 613-567-3336

A complete bidder registration with many of these details included will result in a speedy approval. We want your bids, but we do not want "problem buyers!" NB: We do not normally check references from banks, AMEX, individuals (non-philatelic), etc.

The On-Line Auction

Once you have been registered and approved by us, you can:

Keep track of lots you are interested in, and place bids on-line at any time before the auction begins. This is similar to any other form of advance bidding (ie., sending us a bidsheet by mail, fax, etc.), but you will receive acknowledgement of your bids once they are submitted, and, if you wish, further confirmation by e-mail if you are outbid.

Comprehensive internet bidding instructions can be found at: sparks-auctions.com/how-to-bid-with-us/
