Lots & Collections

THIS SALE

With each successive auction our consignors offer ever more interesting items to collectors.

In every section of Canada we have stamps which delight. The 77 lots of Large Queens will please collectors of mint, of varieties and especially of two-ring numeral postmarks. Small Queens offers mint multiples, proofs, imperforates, cancels and true old-time accumulations. The overall nice quality of the larger used lots is noteworthy. Later Victoria offers scarce large multiples, delightful proofs and imperforates, as well as top quality singles. Our Admiral section of nearly one hundred lots includes a very strong section of War Tax purchased at the time of issue and now on the market for the first time in nearly 100 years. Numerous better items in the Edward and the two Georges lead us into the wonderful array of a Queen Elizabeth Exhibit Collection of Wildings and Cameos. It will likely be a very long time before many of these come back into circulation. Later Elizabeth issues and back of the book have many interesting and scarce items.

Two of the highlights in the BNA section are the magnificent P.E.I. #2 and the well-centered Columbia airmail. It is fascinating that from different consignors we have a trio of "tens." Two from B.C. have the numeral 10 of Williams Lake and a few lots later there is a rare numeral 10 rate marking from Nova Scotia.

The British Commonwealth section will help collectors fill holes and includes a group of nice Penny Blacks.

Our highlight in the auction is the Ken Kershaw collection of Nepal and Tibet. We regard both of these areas as being on the cusp of much greater popularity because of the growing strength of the collector markets in both China and India.

Postal History and postmarks continue to offer lots which originate in Exhibit Collections now broken into collector-oriented lots. Conversely, we see other lots which were groups of interesting covers put away over the years with the thought of developing an exhibit. We hope you enjoy this section.

Lots & Collections, thankfully, does not fill as many bookshelves as our previous auction but does include many top quality offerings worthy of inspection.

Small Queens (Scott #34-47)

- 116 ⦿ **#34-47 Collector's Lifetime Collection of ½c to 50c Small Queens** on 41 black stock pages, also mounted on 22 pages plus in a number of 102 cards. This collection is intact as received and contains a wealth of interesting items. There are, for example several pages of specialty postmarks on 1c to 10 values, some varieties throughout such as 11½ perfs, jumbo copies, position dots, imprint copies, a 6c Major Re-Entry (faulty but presentable) and a large number of each values as follows: ½c (dozens), 1c to 3c (several hundreds of each), 5c (x 260), 6c (x 103), 8c (x 90), 10c (x 60), 20c and 50c (4 of each). More than half of the 5c and 6c are early printings, and there are many early 10c printings including two pale milky rose lilacs. There are also several early 1870s printings of the 1c and 3c. The overall condition is nice and very few faults were found. Mostly fine or better, and a great opportunity to acquire an unpicked Small Queen collection. 📦

OPENING BIDS

These can be found on the website soon after the auction is posted on stampauction-network.com. All lots start at \$2 and we are frequently asked why so many lots are still at only \$2 a day or so before the auction (we are asked especially by nervous consignors). We need two bids on a lot to move the opening bid. One bid of \$1000 doesn't do it; a second bid of \$200 results in an opener of \$210. The bids flood in in the last 36 hours. One reason is that many bidders wait to see which lots are "inexpensive" and then bid on these. Between the last minute bids and an active floor (both live in the room and live on the internet) our consignors are happy. And, at the end of the day some lots are still bargains.

NEPAL & TIBET THE KEN KERSHAW COLLECTION

As a schoolboy Ken Kershaw was able to demonstrate an encyclopedic knowledge of all British flora. His scholarship and phenomenal memory served him well in his academic career. Field trips around the world, and especially in the Arctic, led to his publications on lichens which have set a scholarly gold standard. After early retirement his natural curiosity and training in study and classification served him well as an entrepreneur and later as a restaurateur.

A return to his boyhood hobby has resulted in about a dozen research books, notably the five volume study of Canada's Three Penny Beaver. Ken is intrigued by difficult philatelic problems. He enjoys the challenge of first identifying and then confirming a plating study. Nepal and Tibet introduced the problem of confirming printing flaws as constant, progressive, or non-constant. To do this he obtained as many large blocks and sheets from as many settings as was practical. Although Ken is still working with the pashupati issues the time has come to move on to other pursuits.

NOTES ON THIS AUCTION

Most importantly, there are many times the number of scans on our website than are found in the catalogue. Please visit www.sparks-auctions.com/kershaw

Especially in the case of Nepal, the native laid paper has characteristic inclusions and lack of uniformity such that there may be no stamp in existence that merits the most exacting quality standards of some collectors. We have tried to describe all faults which occurred after manufacture as well as the grossest of the faults during manufacture of this paper. A grade of very fine was used when it occurred to us that a particular sheet or block had better than normal overall appearance.

Nepal is organized by denomination. Tibet is organized by Scott number. We refer to tete-beche stamps as invert, a term which is more commonly used in the literature of the "Himalis."

Ken's unpublished five-volume study **THE HALF ANNA ISSUES OF NEPAL** consists of more than twelve hundred pages of careful documentation of the Nepal issues. For a charge of \$20 including mailing, we can provide the five volumes in electronic PDF form on CD-ROM, which you can read on your computer or transfer to an eReader or tablet device.

VOLUME I: The settings, definitive flaws, and plating criteria

VOLUME II: Plating the flaws in the spandrels and central oval frame.

VOLUME III: Plating the frame flaws.

VOLUME IV: Plating the flaws in the central oval

VOLUME V: Plating the flaws correlated with the double Khukris

x Detail Position 43 - no white oval flaw

1201

(*) #10 1899 Half anna black on thin native paper, sheet of 64, earliest setting and printing with unique variety The first printing of Setting 1a has framelines in the outer margins which were removed from Setting 1b and all subsequent printings. This setting also has characteristic flaws in positions 6, 8, 9 and 17. The well-known white oval flaw in position 43 is illustrated in the literature and continues through the life of the printings. Position 43 on this sheet has no white oval flaw. **No other example is known.** The sheet has toning spots especially in margins but is otherwise in a remarkable state of preservation. Accompanied by 10 pages of scans and background text.

.....Est \$2,500

- 1202** (*) **#10 1903 Half anna black, Setting 3, imperf on thin white native paper** An unused large block of 56 missing the top row of the sheet, some thinning at upper right corner and paper thickening causes fault in row 1/2, otherwise clear impressions and generally very fine. Setting 3 is unusual in that most stamps which can be attributed to this printing were pin-perforated.

..... Est \$600

- 1203** ◎ **#10, 10a 1906 Half anna black with very rare postmark** This strip of 3 comes from the rare setting 5 and can be positively identified as clichés 5, 6 and 7. Cliché 6 is inverted and cliché 7 has the flattened base. The strip has an almost complete strike of the Sawari Hunting Camp used during King George V's visit to Nepal in 1911. Illustrated in Singer's Nepal.

- 1204** (*) **#11, 11a 1917 Half Anna red orange unused block of 24 with invert pair, 6th Setting** with Dr. W.C. Hellrigl 2004 certificate to quote "imperforate on medium native paper, unused block of 24 from the upper left corner of the sheet (pos 1-6, 9-14, 17-22, 25-30), with an inverted cliché on pos 6...This is the second largest unused multiple of this stamp, the largest being a half sheet of 32. All unused copies derive from the two sheets. The multiple described here is ex Heddergott collection...The multiple is in fine condition. The right foxing spots in the margin are typical of this issue and they occur on all other multiples cut from the two known sheets... genuine in all respects." The block of 32, referred to in the certificate, was sold by Robson Lowe in 1967 and has not been seen since. This block sold in the Heddergott sale in 1980. This block has two vertical creases. One is between the third and fourth row, the other is a pre-printing crease through the fourth row. Mint tête-bêche pairs of this stamp are unpriced and are world-class rarities, Hellrigl: "The total number of tête-bêche pairs known amounts to less than one dozen, the majority being used. Scott catalogue value is for

24 singles with the invert pair at twice two singles.

- 1401** */** #18, 20 1857 1c blue perf. 15½ Type I and Type II **Combination** block of six with two never hinged. Type II was produced from an altered die and when plate 12 was laid out, transfer rolls from both the original and altered die were used. This has a 2011 Philatelic Foundation certificate "unused, OG, block of 6 (2x3), positions 32-33/42-43/52-53R12, B/C/B reliefs, top and bottom rows Type II, centre row Type I, and we are of the opinion that it is genuine, previously hinged, the top left stamp with a small adherence on the reverse". The block is fresh, without fault and the two middle stamps are never hinged (Scott 18 CV\$4,200 for hinged and the earliest premiums for never hinged starting with the 1879 issues are more than 300%). An important classic block destined for an advanced collection.

OPENING BIDS

These can be found on the website soon after the auction is posted on stampauction-network.com. All lots start at \$2 and we are frequently asked why so many lots are still at only \$2 a day or so before the auction (we are asked especially by nervous consignors). We need two bids on a lot to move the opening bid. One bid of \$1000 doesn't do it; a second bid of \$200 results in an opener of \$210. The bids flood in in the last 36 hours. One reason is that many bidders wait to see which lots are "inexpensive" and then bid on these. Between the last minute bids and an active floor (both live in the room and live on the internet) our consignors are happy. And, at the end of the day some lots are still bargains.

TERMS & CONDITIONS (Please read carefully)

1. The property described in this catalogue will be offered at public auction by Sparks Auctions Inc. (Sparks) on behalf of various consignors. By bidding on any lot, whether in person, or through an agent, via Stamp Auction Network, by mail, email, fax, telephone, website, or any other means, the bidder acknowledges and agrees to all of the following Terms and Conditions of Sale.

2. The highest bidder acknowledged by the auctioneer shall be the buyer. The term "hammer price" means the last bid acknowledged by the auctioneer. The purchase price payable by the buyer will be the sum of the hammer price and a commission equal to 15% of the hammer price ("buyer's premium"), together with any sales tax which may be due on the sale.

3. All bids are per lot as numbered in the catalogue. The auctioneer shall regulate the bidding and reserves the right to reject any bid believed by him not to be made in good faith; to withdraw any lot prior to sale; to divide a lot; or to group two or more lots and to act on behalf of the vendor. In the event of any dispute, the auctioneer's decision shall be final. Sparks will execute bidding instructions on behalf of clients, but will not be responsible for any errors in the execution of such bids.

4. Unless a bidder has established credit with Sparks prior to the sale, Sparks must receive payment in full before the lots will be delivered. Buyers not known to Sparks must make payment in full within five days from the date of sale. Accounts more than thirty days in arrears will be subject to a late payment charge of 2% per month. All expenses incurred in securing payment from delinquent accounts will be charged to the defaulter. A fee of \$100.00 will be charged for any cheque returned for insufficient funds.

5. All sales are in CANADIAN FUNDS. Payment may be made by bank draft, bank transfer, cheque drawn on a Canadian or U.S. bank, Canadian or International postal money order, cash or credit card (VISA and MasterCard only). There are no additional fees for payment by credit cards, please provide at time of bidding. Payment in U.S. funds is acceptable at the same rate which Sparks can purchase Canadian Funds at our bank (2.5% percent above the mid-market rate). Contact us if you require the exact amount owed in U.S. funds. Credit cards will be processed in Canadian Funds.

6. Buyers from Canada will be charged Federal GST or HST. Absentee bidders resident outside Canada are not liable for Canadian taxes if purchases are delivered outside of Canada. See shipping instructions.

7. Until paid for in full, all lots remain the property of Sparks on behalf of the seller.

8. The buyer assumes all risk for delivery of purchased lots and agrees to pay for prescribed shipping costs.

9. Because the descriptions and scans of the auction will be available in a printed catalogue, our website and on Stamp Auction Network, there is a chance of technical error. In that event the auctioneer's decision will be final. If discovered before the sale a notice will be posted on sparks-auctions.com. Opening bids will be available on the websites and will be updated. These are only provided as a service to bidders and Sparks does not guarantee their completeness or accuracy.

10. Any lot, the description of which is obviously incorrect, is returnable, but only if the lot is returned within 14 days of receipt. All disputed lots must be returned intact with the original packing material. The following lots may not be returned for any reason: Lots containing ten or more items; any lot described with "faults" or "defects" may not be returned because of any fault or defect. No illustrated lots may be returned because of centering, margins or other factors shown in the illustrations.

11. All lots are sold as genuine. If a prospective purchaser wishes to obtain other expert opinion from a mutually acceptable authority, an

extension may be granted on a lot prior to the commencement of the auction provided that the following conditions are met; (1) the purchase price of the lot must be paid in full, (2) the item must be submitted to the mutually acceptable expertizing committee with a properly executed application form within 14 days of the sale, (3) a copy of the application form must be given to Sparks, (4) unless prior arrangements are made, extensions are granted for a period of up to 100 days; (5) if in the opinion of the authority the lot is not genuine or was grossly misdescribed, the purchaser shall receive a full reimbursement of the purchase price plus costs of certification up to \$100, and (6) lots back stamped or marked are not returnable. It is the purchaser's responsibility not to let this happen.

Notes on catalogue values and reference

Catalogue values are listed for most lots offered. These are the best available guides to the retail price of a single stamp or set provided that the item(s) are the same quality as the standard described in the introduction to each catalogue. Exceptional quality will often sell above the catalogue value; inferior quality will sell for less; faulty stamps in a lot can result in a sale price of a small percentage of the catalogue price.

When cataloguing collections we use the value for the grade specified. For Scott this grade is very fine. For Unitrade we use the grade specified at the start of the textual description. Thus a "fine" collection will have all stamps added at the fine price. We do not count obvious forgeries, reprints etc. and usually do not count faulty or ugly stamps. A lightly penciled X under a stamp means it was not counted in the catalogue value. We put a light pencil note beside more expensive stamps and put a total catalogue value at the bottom of each page to assist viewers.

The following catalogues have been used. If there is a variance, this will be mentioned in the text of the description. The term "owner's catalogue value" indicates a variety of approaches and may include older versions of catalogues. We will have inspected and reviewed the result but not re-catalogued; hence we do not vouch for the exact total of catalogue value.

\$800 - \$1500	\$50	\$32,000 - \$50,000	\$2,000
		above \$50,000	\$5,000

- 1) Please bid using the increments above. All bids not conforming to these increments will be lowered to the appropriate amount.
- 2) You have the option to break ties or increase your bids if needed by checking the appropriate box on the bid sheet.
- 3) If you are bidding through the internet, after you have entered your bids you will receive a computer generated email describing each lot you bid on and telling you where you stand in terms of other bidders without divulging the high bid. You then have the option of updating your bids. If you bid by mail or fax you have the option of asking to receive this email by checking the appropriate box and including your email address.
- 4) If you give your bids to Stamp Auction Network, or to Sparks Auctions you will only pay one increment over the second highest bid. Your top (maximum) bid will be used only if another bid is one increment below yours, or exactly the same as your bid but was received after yours. In the event of tie bids, the earliest bid received by us will be successful. We do not accept "buy" bids.

5) The auctioneer may permit telephone bidding during the auction. This must be arranged well in advance of the auction starting time. Sparks reserves the right to refuse telephone bidding at any given time. Sparks will not be held responsible in the event that a telephone bidder cannot be contacted. Applicable telephone expenses will be charged to telephone bidders.

6) OPENING BIDS will be available approximately one week before the auction. (With one week to go most of these will be well below the final price). New opening bids will be updated at least daily. If you see that an opening bid is higher than you wish to bid for a lot you would like to buy, this feature allows you to focus on other lots of interest to you. Sparks will not be held responsible in the event of errors in the opening bids provided before the sale.

7) You have the option of limiting your purchases to a specified dollar figure (e.g. \$325), or to an approximate figure. This feature allows you to bid with the confidence that you will not be financially embarrassed if you are very successful in the auction. It also allows you to use a strategy of bidding just above the opening bid for many lots with the expectation of winning only a minority of these.

8) With currencies fluctuating as widely as they do it is no longer practical to offer bidding in both Canadian and U.S. dollars. However you can specify the limit of your total purchases in US funds and it will be converted to the appropriate amount on the day of the sale.

How To Bid Live Via The Internet

Live bidding on the internet allows bidders anywhere in the world to participate in this auction. Sparks Auctions is pleased to make the auction available through Stamp Auction Network, and we will do everything we can for our customers to make the process simple, trustworthy and fun.

Connect to Stamp Auction Network at:
stampauctionnetwork.com

Register once and create a user name, which will allow you to choose auction firms to bid with, including Sparks Auctions. We need to confirm your account before you will be able to place bids with us. For faster bidder confirmation, please reference Ian Kimmerly, Sparks Auctions, or other North American auction houses when you create your account.

Once you have been registered and approved by us, you can:

Keep track of lots you are interested in, and place bids on-line at any time before the auction begins. This is similar to any other form of advance bidding (ie., sending us a bidsheet by mail, fax, etc.), but you will receive acknowledgement of your bids once they are submitted, and, if you wish, further confirmation by e-mail if you are outbid.

Bid Live by watching action on-screen. The Message window will tell you which lot is being offered, what the current bid is, and if it is approaching Last Call. Click the button

with the amount of your next bid (the next six increments over the current bid are shown). When an item is sold, the hammer price is announced. **The page will refresh more quickly if you click the Hide Images button.** If you are not bidding, close the window to reduce traffic on the site for others.

Watch The Auction by logging in beforehand and participating as a spectator only. You can even listen to the audio broadcast of the auction on your computer. (Audio requires your web browser to use the Adobe FlashPlayer plug-in, which you may be asked to install the first time you connect.)

Some Bidding Tips

Bid Early Do not hesitate to press the button for the maximum amount you are willing to pay. This is comparable to keeping your hand up on the auction floor. The bidding will only reach your maximum if a bid is received for the increment below (ie., an underbid).

Listen To The Auctioneer Use audio so you can hear the auctioneer. You will know where the bidding is, and have a better sense of whether an item has reached Last Call.

Pass When You Are Done If you have been actively bidding on an item and wish to drop out, **PLEASE PRESS THE PASS BUTTON.** If you do not, the whole auction is delayed.
