Lots & Collections

THIS SALE

Consignors have rewarded us with an overwhelming number of lovely stamps, collections, and carton lots. One result is that we can offer higher quality in our single lots and, as a consequence, more intact collections are offered than in previous auctions.

One consignor who entrusted us with his superb collection - Lot 7 is one example - did so as he believes Sparks is the best suited to ensure that future owners will enjoy and appreciate his treasures as much as he did.

The Canada and BNA sections are not only very close to complete by major Scott numbers but also from Victoria through George VI are reasonably complete for the varieties listed in the Unitrade Catalogue. The quality of these offerings is often outstanding. Many lots are rarities. In January 2009 we offered the discovery block of what is now listed as #270ii, this auction we offer the only known used single. Others offer intriguing quantities such as 172 of the possible 200 examples of #1359ii in 3 lots which together have the astounding catalogue value of \$344,000. Browsing through our Canada and BNA section is more fun than a Neiman-Marcus catalogue.

Our British Commonwealth is strong and anchored by a wonderful Great Britain collection (and more of this collection can be found with the lots and collections).

The worldwide section has strong USA, France, Germany and Offices/Colonies, and extensive North Vietnam. Individual rarities from Lombardy-Venetia, France, Spain, and Thailand will fill gaps in advanced collections. All the sections of this auction offering single stamps are stronger in quality and rarity than was found in our previous auctions.

The offerings of postal history as single covers, smaller lots, and the many cartons of covers range from the year 1459 (with Venetian Guild Mark) to modern day. Among the valuable single covers are Canada #10, 1918 flown registered envelope, two bisects of Nova Scotia, a Nova Scotia shilling and three one penny stamps to Australia and scarce Newfoundland including a Columbia flight cover. A broad range of Canada and worldwide are found in the cartons. Forty-nine lots of literature offer many out of print reference works.

Our lots and collections section is the most extensive by number of lots, variety, and especially bulk. Many valuable collections are found in the boxes of large envelopes and in 7 bookcases filled with albums. From the point of view of bulk it is the 361 cartons (mostly bankers boxes) which physically dominate the auction.

Some 3500 scans are found on our website (sparks-auctions.com) which is about 3 times the number in the catalogue. We will have extended viewing hours to accommodate viewers in this auction. We hope you enjoy it as much as we have in assembling and describing this auction.

⊙ Used (includes full range of postally used, cancel-to-order, precancels)
XF Extremely Fine applies to stamps with exceptional quality and margins well in excess of what would typically be found. This term is used rarely and is not applied for modern stamps. The term "Superb" is occasionally used as an adjective in the text of a description.
VF A stamp in superior condition which is well-centered and without fault.
FVF Applied to stamps that are somewhat less well-centered than very fine, while taking into account what may be considered as typical margins of classic material. The term has also been applied to multiples with individual stamps with range of grade or for larger lots/collections.
F(ine) Stamps having perforations that do not cut into the design and without damaging faults. Items described as such may have slight detracting features such as short perforation tips or natural inclusion. Many better classic material naturally falls into this category and may be expected to command prices similar to those ascribed by catalogue values.
VG Very Good Equivalent to "average". Typically with poor centering, heavy cancellation or faults such as minor thins, light creases, etc.
Faulty Applied to an item with tears, heavy crease(s), unsightly postmarks, serious thins or surface scuffs.

Lot 437 - This part pane has a double printing with a *grey* cast.

437 ** #1359ii 1992 43c Flag over Field, Leigh-Mardon printing, double printed grey cast, during a normal printing run of a high speed web press a double printing is impossible. However in preparation for the high speed press a “make-ready” is often fed through to check for ink registration. On this occasion a make-ready was fed through the press twice resulting in a weak impression and overlaying that with a normal strong impression. Normally make-readys would be destroyed but on this occasion two double printed panes were packaged, sent to Canada Post and sold to an Ottawa resident, who then, upon noticing the variety, sold the top blocks of 20. It is these two blocks of 20 with the doubling most pronounced upon which the Unitrade listing and valuation has been established. This part pane has a double printing with a *grey* cast. The stamp is without gum, and shows no residuals or signs of having been cancelled. The stamp was printed from Plate 1B, and shows the characteristic multiple re-entries in the four corner squares, in the letters of the word "POSTAGE", and in the letters "ONE P". A very scarce variety, especially in unused condition. I have signed it in order to attest to its authenticity." The colour is deep black and is quite possibly the listed variety of intense black (Scott \$16,000, S.G. £15,000). A lovely example of the world's first stamp.

The next 26 lots consist of a specialized 1870s to modern Ontario duplex collection that was put together over a period of 15 years, and which formed a basis for most of the new information contained in the 3d edition of the Catalogue of Duplex Cancellations, by Stéphane Cloutier. The collector's goals were to collect and record earliest and latest dates, different indicia including errors (reversed and missing), hammer deterioration, usages including registered, special delivery, receiving and transit.

Several items in this collection are either the only known examples, or one of two or three known. The great majority are #8 size as there are typically only one or two #10 size covers per county. Whenever possible, the best possible strike was collected on cover. The missing duplexes are either not known used, or were used for a very short period. A checklist of the different duplexes, ERD and LRD and time marks is included with each county and can be seen on the web. These have been collected primarily for the cancellations, and although condition is mostly fine-very fine, some faults can be expected. Each item has a small pencil mark identifying its duplex number. We have found the owner's retail prices to be quite lower than most dealers' retail prices.

As the Large Queen issue was introduced in April 1868, many postmasters wished to use up the old Nova Scotia stamps. Three cents was the new Dominion rate. In 2010 the Greene Foundation wrote "the item could be genuine but the lack of a cancel tying the bisect line to cover prevents us from giving an opinion". Not noted by the Greene Foundation was the lack of evidence of a scoreline in the event someone has used a scalpel or knife to create a bisect and also a faint staining which ties the bisect to the cover. Envelope has a stain and is damaged in upper left and lower left corners. Both stamps have some damage.

2024 */**/⊙ **1850s-2005 Worldwide collection**, in 14 large Citation Albums (each 14cm or 5½inches). Worldwide except Canada and Great Britain. The albums contain approximately 8,000 pages (16,000 sides) with space for well over a half million stamps and except for the 2 countries not included it apparently has complete pages usually to 2005. overall the pages are fresh with no noticeable damage. Collection has over 140,000 stamps with modest duplication which is mostly stamps pre-1920 from Australia (these includes varieties, perf OS), Australian States, U.S.A., New Zealand, other British Colonies including Hong Kong and Straits Settlements. We doubt that duplication exceeds 5,000 stamps. many countries have the first (earliest) page or pages complete or nearly so. However the album does not picture the expensive early issues, so don't dream about complete Mauritius. The few early classics with high catalogue value are spacefillers. Within the collection are three distinct periods: Up to the 1930s there may be duplicates and pages are relatively full, most stamps are used. After WWII the used stamps start tapering off after 1970. Australia and New Zealand have complete mint never hinged issues from about 1970 to 2005. Starting about 1980 several dozen other countries have new issues for varying periods of time. never hinged stamps are fresh and in mounts. Other mint stamps are carefully hinged. We noted a number of 1935 Silver Jubilee sets including Australia, a fair number of modern NH definitive sets but also earlier including India 1949 Definitive set NH, Australia 1949 Arms hinged and 1963 Sterling Navigators NH. In addition to Australia and New Zealand new issues were bought for many British Colonies in the 1980s especially Pacific Islands and Papua New Guinea (1952 set I.h., 1960s J1-J5 NH), some Caribbean Islands especially Dominica, Ireland, Gibraltar and notably the Channel Islands and Isle of Man. Outside the Commonwealth Czechoslovakia is strongest with many NH souvenir sheets, etc. Yugoslavia, Finland, Austria and Netherlands among others have a good number of modern NH and the Latin American countries and others have classics among which better items may be found. A neat and well-presented collection, generally fine or better stamps.

TERMS & CONDITIONS

(Please read carefully)

1. The property described in this catalogue will be offered at public auction by Sparks Auctions Inc. (Sparks) on behalf of various consignors. By bidding on any lot, whether in person, or through an agent, via Stamp Auction Network, by mail, email, fax, telephone, website, or any other means, the bidder acknowledges and agrees to all of the following Terms and Conditions of Sale.

2. The highest bidder acknowledged by the auctioneer shall be the buyer. The term "hammer price" means the last bid acknowledged by the auctioneer. The purchase price payable by the buyer will be the sum of the hammer price and a commission equal to 15% of the hammer price ("buyer's premium"), together with any sales tax which may be due on the sale.

3. All bids are per lot as numbered in the catalogue. The auctioneer shall regulate the bidding and reserves the right to reject any bid believed by him not to be made in good faith; to withdraw any lot prior to sale; to divide a lot; or to group two or more lots and to act on behalf of the vendor. In the event of any dispute, the auctioneer's decision shall be final. Sparks will execute bidding instructions on behalf of clients, but will not be responsible for any errors in the execution of such bids.

4. Unless a bidder has established credit with Sparks prior to the sale, Sparks must receive payment in full before the lots will be delivered. Buyers not known to Sparks must make payment in full within five days from the date of sale. Accounts more than thirty days in arrears will be subject to a late payment charge of 2% per month. All expenses incurred in securing payment from delinquent accounts will be charged to the defaulter. A fee of \$100.00 will be charged for any cheque returned for insufficient funds.

5. All sales are in CANADIAN FUNDS. Payment may be made by bank draft, bank transfer, cheque drawn on a Canadian or U.S. bank, Canadian or International postal money order, cash or credit card (VISA and MasterCard only). There are no additional fees for payment by credit cards, please provide at time of bidding. Payment in U.S. funds is acceptable at the same rate which Sparks can purchase Canadian Funds at our bank (2.5% percent above the mid-market rate). Contact us if you require the exact amount owed in U.S. funds. Credit cards will be processed in Canadian Funds.

6. Buyers from Canada will be charged Federal GST or HST. Absentee bidders resident outside Canada are not liable for Canadian taxes if purchases are delivered outside of Canada. See shipping instructions.

7. Until paid for in full, all lots remain the property of Sparks on behalf of the seller.

8. The buyer assumes all risk for delivery of purchased lots and agrees to pay for prescribed shipping costs.

9. Because the descriptions and scans of the auction will be available in a printed catalogue, our website and on Stamp Auction Network, there is a chance of technical error. In that event the auctioneer's decision will be final. If discovered before the sale a notice will be posted on sparks-auctions.com. Opening bids will be available on the websites and will be updated. These are only provided as a service to bidders and Sparks does not guarantee their completeness or accuracy.

10. Any lot, the description of which is obviously incorrect, is returnable, but only if the lot is returned within 14 days of receipt. All disputed lots must be returned intact with the original packing material. The following lots may not be returned for any reason: Lots containing ten or more items; any lot described with "faults" or "defects" may not be returned because of any fault or defect. No illustrated lots may be returned because of centering, margins or other factors shown in the illustrations.

11. All lots are sold as genuine. If a prospective purchaser wishes to obtain other expert opinion from a mutually acceptable authority, an

extension may be granted on a lot prior to the commencement of the auction provided that the following conditions are met; (1) the purchase price of the lot must be paid in full, (2) the item must be submitted to the mutually acceptable expertizing committee with a properly executed application form within 14 days of the sale, (3) a copy of the application form must be given to Sparks, (4) unless prior arrangements are made, extensions are granted for a period of up to 100 days; (5) if in the opinion of the authority the lot is not genuine or was grossly misdescribed, the purchaser shall receive a full reimbursement of the purchase price plus costs of certification up to \$100, and (6) lots back stamped or marked are not returnable. It is the purchaser's responsibility not to let this happen.

SHIPPING INFORMATION

Unless specific other arrangements are made between the buyer and Sparks Auctions, lots will be shipped in the following manner:

Within Canada:

- a) Single or multiple lots that fit into one or more regular EXPRESS POST envelopes will be shipped by that method with signature required. These lots will be charged postage only but not a handling, packaging, or insurance fee.
- b) Cartons and larger lots will normally be shipped by parcel post with signature required. If bulky lots have a value in excess of \$1000 they will be shipped by EXPRESS POST with signature required. This category of lots will usually be charged an additional handling or packaging fee.

To the USA:

- a) Single or multiple lots will be sent by Fed-Ex with signature required and no extra handling, packaging, or insurance fees.
- b) Cartons and larger lots will be shipped by UPS ground with signature required. This category of lots will usually be charged an additional handling or packaging fee. NOTE: The U.S. Postal Service policy of irradiating mail risks damage to stamps especially when they are encased in a plastic mount. We will risk sending lots by the USPS only after receiving written instructions from a purchaser who has paid in full and specifically accepts receipt on an as is basis.

Overseas:

- a) Single or multiple lots will be sent by Fed-Ex with signature required and no extra handling, packaging or insurance fees.
- b) Carton and larger lots will be shipped by pre-arrangement only. We reserve the right to not ship to areas of the world not served by Fed-Ex.

Notes on catalogue values and reference

Catalogue values are listed for most lots offered. These are the best available guides to the retail price of a single stamp or set provided that the item(s) are the same quality as the standard described in the introduction to each catalogue. Exceptional quality will often sell above the catalogue value; inferior quality will sell for less; faulty stamps in a lot can result in a sale price of a small percentage of the catalogue price.

When cataloguing collections we use the value for the grade specified. For Scott this grade is very fine. For Unitrade we use the grade specified at the start of the textual description. Thus a "fine" collection will have all stamps added at the fine price. We do not count obvious forgeries, reprints etc. and usually do not count faulty or ugly stamps. A lightly penciled X under a stamp means it was not counted in the catalogue value. We put a light pencil note beside more expensive stamps and put a total catalogue value at the bottom of each page to assist viewers.

The following catalogues have been used. If there is a variance, this will be mentioned in the text of the description. The term "owner's catalogue value" indicates a variety of approaches and may include older versions of catalogues. We will have inspected and reviewed the result but not re-catalogued; hence we do not vouch for the exact total of catalogue value.

Other Specialized catalogues as noted in descriptions.

The U.S. Specialized and the Scott Classic are referred to as Scott interchangeably with the standard 6 volumes.

- 1) Please bid using the increments above. All bids not conforming to these increments will be lowered to the appropriate amount.
- 2) You have the option to break ties or increase your bids if needed by checking the appropriate box on the bid sheet.
- 3) If you are bidding through the internet, after you have entered your bids you will receive a computer generated email describing each lot you bid on and telling you where you stand in terms of other bidders without divulging the high bid. You then have the option of updating your bids. If you bid by mail or fax you have the option of asking to receive this email by checking the appropriate box and including your email address.
- 4) If you give your bids to Stamp Auction Network, or to Sparks Auctions you will only pay one increment over the second highest bid. Your top (maximum) bid will be used only if another bid is one increment below yours, or exactly the same as your bid but was received after yours. In the event of tie bids, the earliest bid received by us will be successful. *We do not accept "buy" bids.*

5) The auctioneer may permit telephone bidding during the auction. This must be arranged well in advance of the auction starting time. Sparks reserves the right to refuse telephone bidding at any given time. Sparks will not be held responsible in the event that a telephone bidder cannot be contacted. Applicable telephone expenses will be charged to telephone bidders.

6) OPENING BIDS will be available approximately one week before the auction. (With one week to go most of these will be well below the final price). New opening bids will be updated at least daily. If you see that an opening bid is higher than you wish to bid for a lot you would like to buy, this feature allows you to focus on other lots of interest to you. Sparks will not be held responsible in the event of errors in the opening bids provided before the sale.

7) You have the option of limiting your purchases to a specified dollar figure (e.g. \$325), or to an approximate figure. This feature allows you to bid with the confidence that you will not be financially embarrassed if you are very successful in the auction. It also allows you to use a strategy of bidding just above the opening bid for many lots with the expectation of winning only a minority of these.

8) With currencies fluctuating as widely as they do it is no longer practical to offer bidding in both Canadian and U.S. dollars. However you can specify the limit of your total purchases in US funds and it will be converted to the appropriate amount on the day of the sale.

How To Bid Live Via The Internet

Live bidding on the internet allows bidders anywhere in the world to participate in this auction. Sparks Auctions is pleased to make the auction available through Stamp Auction Network, and we will do everything we can for our customers to make the process simple, trustworthy and fun.

Connect to Stamp Auction Network at:
stampauctionnetwork.com

Register once and create a user name, which will allow you to choose auction firms to bid with, including Sparks Auctions. We need to confirm your account before you will be able to place bids with us. For faster bidder confirmation, please reference Ian Kimmerly, Sparks Auctions, or other North American auction houses when you create your account.

Once you have been registered and approved by us, you can:

Keep track of lots you are interested in, and place bids on-line at any time before the auction begins. This is similar to any other form of advance bidding (ie., sending us a bidsheet by mail, fax, etc.), but you will receive acknowledgement of your bids once they are submitted, and, if you wish, further confirmation by e-mail if you are outbid.

Bid Live by watching action on-screen. The Message window will tell you which lot is being offered, what the current bid is, and if it is approaching Last Call. Click the button

with the amount of your next bid (the next six increments over the current bid are shown). When an item is sold, the hammer price is announced. **The page will refresh more quickly if you click the Hide Images button.** If you are not bidding, close the window to reduce traffic on the site for others.

Watch The Auction by logging in beforehand and participating as a spectator only. You can even listen to the audio broadcast of the auction on your computer. (Audio requires your web browser to use the Adobe FlashPlayer plug-in, which you may be asked to install the first time you connect.)

Some Bidding Tips

Bid Early Do not hesitate to press the button for the maximum amount you are willing to pay. This is comparable to keeping your hand up on the auction floor. The bidding will only reach your maximum if a bid is received for the increment below (ie., an underbid).

Listen To The Auctioneer Use audio so you can hear the auctioneer. You will know where the bidding is, and have a better sense of whether an item has reached Last Call.

Pass When You Are Done If you have been actively bidding on an item and wish to drop out, **PLEASE PRESS THE PASS BUTTON.** If you do not, the whole auction is delayed.
