МИР И ПРОГРЕСС

Radio Station «Peace and Progress»,
Moscow, USSR

On a fall morning, while exploring the shortwave bands, I discovered Radio Station Peace and Progress in Moscow for the first time. The signal was weak with only slight interference from other stations close to the frequency. The level of atmospheric noise was moderate that day, as was the signal fading.

I tuned in at the half hour to hear the news in English. This included prominent American experts dismiss the Soviet threat, U.S. military budget of $7 billion approved, and 30 000 new jobs opened in the Soviet Union.

Mr Neil Carleton,

Thank you for your report
on the reception

OF RADIO STATION
"PEACE AND PROGRESS"

Date the 28th of September, 1982

Time 13.30 - 14.00 GMT

Frequency 13 mb

Your report has been checked with
our records and is correct in every detail.

Best wishes from Radio Station Peace
and Progress, the Voice of Soviet Public Opinion.

The first verification card from Radio Station Peace and Progress arrived 131 days after I mailed my letter. A second card from Moscow came a little later to confirm my reception report of the broadcast on September 28, 1982, at 1330 GMT on 21615 kHz.

The text on this unique 1984 protest stamp is 'radio FREE RUSSIA' at the top in English. The same message is repeated in Russian at the bottom in capital letters.

Why was it produced, and who produced it? Was it ever used on mail?

1984 was a turbulent year in Russia:

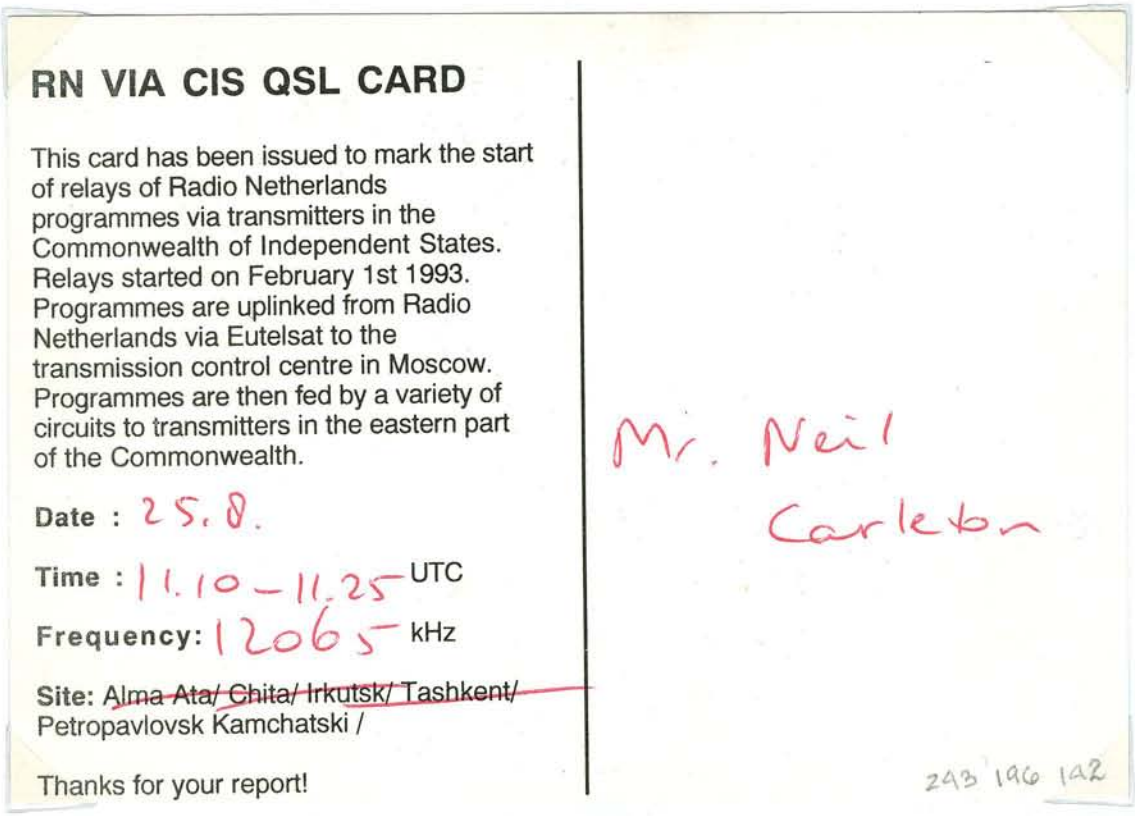
February	Soviet leader Yuri Andropov dies and is succeeded by Konstantin Chernenko as General Secretary of the Communist Part of the Soviet Union.
May	The Soviet Union announces it will boycott the 1984 Summer Olympics in California.
July	Salyut 7 Cosmonaut Svetlana Savitskaya becomes the first woman to perform a space walk.
December	A Soviet cruise missile crashes into Inarinjarvi Lake in Finland.

My German is limited and I tried to translate the text on this envelope with the help of internet dictionaries. This commemorative envelope appears to have been created to commemorate a Special Flight of Friendship in 1984 for the Club of Radio Travellers Through the Soviet Union. It seems to be a listeners club associated with Radio Moscow.

The route of flight SU 664 was Dresden (Germany), Kiev (Ukraine), Kischinjow (Moldavia), Rostow (Russia), Moscow (Russia), and Berlin/Dresden (Germany). Perhaps the flight started at Berlin instead.

Did the club members take this flight? Was it a journey for souvenir envelopes?

In 1993, the relay of Radio Netherlands programs began on transmitters in the Commonwealth of Independent States. These included broadcasting stations at Alma Ata, Kazakstan; Chita, Russia; Irkutsk, Russia; Tashkent, Uzbekistan; and Petropavlovsk-Kamchatski, Russia.



RN VIA CIS QSL CARD

This card has been issued to mark the start of relays of Radio Netherlands programmes via transmitters in the Commonwealth of Independent States. Relays started on February 1st 1993. Programmes are uplinked from Radio Netherlands via Eutelsat to the transmission control centre in Moscow. Programmes are then fed by a variety of circuits to transmitters in the eastern part of the Commonwealth.

Date : 25.8.

Time : 11.10 – 11.25 UTC

Frequency: 12065 kHz

Site: ~~Alma Ata/ Chita/ Irkutsk/ Tashkent/~~ Petropavlovsk Kamchatski /

Thanks for your report!

Mr. Neil
Carleton

243 196 142

The program I heard from the relay station at Petropavlovsk-Kamchatski on August 25, 1993, at 1110 UTC on 12065 kHz, was broadcast to audiences in the far east. Although it was a weak signal in eastern Ontario, it wasn't hard to hear the details.

This verification card arrived from the Netherlands only 22 days after I mailed my reception report with a selection of used Canadian stamps, and a radio station sticker from Ottawa.

Adventist World Radio (AWR), established in 1971, is the international broadcasting service of the Seventh-day Adventist Church. AWR has broadcast on shortwave from various transmitters across Russia.

In 1996, during the 25th anniversary of AWR broadcasting, special QSL stamps were produced to confirm the reception reports of listeners around the world. Some of the verification stamps were created for the six locations in Russia that AWR has broadcast from - Moscow, Taldom, Novosibirsk, Samara, Ekaterinburg, and Kurovskaya.

RWANDA

Adventist World Radio (AWR), established in 1971, is the international broadcasting service of the Seventh-day Adventist Church. AWR has been on the air from 14 different countries in Africa.

For a short period in 1975, test broadcasts of AWR programs were made in Rwanda on the relay station of Deutsche Welle at Kigali. Plans were made to establish an AWR station at Kigali. Equipment for the new station was donated, but never installed because war broke out in Rwanda in 1994. It was more than a decade later that AWR's Voice of Hope FM radio station went on the air at Kigali.

When AWR celebrated its 25th anniversary in 1996, there was still optimism that a shortwave station might be possible in Rwanda. Special QSL stamps were produced that year to confirm the reception reports of listeners worldwide who heard AWR programs. One of the QSL stamps was created to confirm reports of AWR broadcasts from Kigali.

The Voice of Hope, AWR's FM station in Kigali, broadcasts on 106.4 MHz. The station was opened in 2005. Historically, AWR has concentrated its efforts on shortwave radio. With the migration of many people in African areas from rural to urban locations, AWR is partnering with local church organizations to construct local radio stations.

SINGAPORE

1919 VPW, a maritime communication station transmitting Morse code on 88 kHz longwave, was the first wireless station.

1927 Radio station 1SE started broadcasting on 910 kHz.

1930s Sir R.E. Earl operated shortwave amateur station 2SE with broadcast programs on Saturday twice a month. In 1930, VS6XW broadcast on 28.75 m, and VS1AB in the 41 m band was on the air 1932-34.

1933 Radio station ZHI broadcast on 6060 kHz for 2.5 hours on Monday, Wednesday, and Friday.

1936 On June 1, ZHL began regular broadcasting on 1232 kHz .

1942 The shortwave and mediumwave station at Caldecott Hill made its last broadcast under British colonial administration in late February, and was reopened by the Japanese administration on March 27.

1945 Shortwave signals from Singapore to the Philippines on 15450 kHz were reported in the U.S.A.

This verification postcard arrived in the mail from Singapore to confirm the reception report of Wilf Richards in Saskatchewan for a program he heard from the British Far Eastern Broadcasting Service on August 29, 1949, at 1415 GMT on 11880 kHz.

ST. HELENA

Known locally on the island as Radio St. Helena, the station is formally registered as the St. Helena Government Broadcasting Station. Radio St. Helena was officially opened on December 25, 1967, and first broadcast on 1511 kHz, or 200 m. On November 1, 1978, the frequency changed to 1548 kHz, or 194 m.

The station was established as part of a ten year plan for education. The two hour school broadcasts on Friday mornings ended in the mid 1980s.

Radio St. Helena, which is the only radio station on the island, celebrated its 25th anniversary in 1992 with a special commemorative postage stamp. This first day cover is signed by Anthony Leo, the Station Manager.

Ontario, KOA 1AO
CANADA

In 1990, Radio St. Helena made its first broadcast to the world on shortwave. This special, once-a-year transmission, became a popular event for radio enthusiasts around the world. During the station's 25th anniversary year, I received this verification card in the mail to confirm my reception report for the annual broadcast I heard from St. Helena on October 23, 1992, at 2105 GMT on 11092 MHz USB.

Although the last Radio St. Helena Day broadcast took place on October 23, 1999, when the transmitters became inoperable, a Radio St. Helena Day Revival is planned for November 6, 2006. I'll be listening with headphones for the North America transmission at 2330 UTC Saturday, and 0100 UTC Sunday.

ST. KITTS

1930s Experimental broadcasting started with a low powered station heard mainly in the Basseterrre area. The call sign was ZIZ.

1960 To prepare for the operation of a government radio station on St. Kitts, Karney Osbourne was sent to Canada, and to the BBC in London, for training in broadcasting.

1961 Radio station ZIZ, transmitting on 555 kHz, was officially opened at Springfield on Sunday, March 5, 1961. The station initially broadcast from 6:00 to 9:00 p.m. each day.

1972 Television broadcasting started, and the small staff of ZIZ ran both the radio and T.V. operations.

1973 FM transmissions started on 96 MHz.

1975 The power of ZIZ was increased to 10,000 watts, and a studio was established at Charlestown, Nevis.

1978 A postage stamp was issued that featured the radio and television facilities of ZIZ. The stamp was also issued with overprints.

SEYCHELLES

1945 Radio broadcasting in Seychelles started with a daily one hour program by the Department of Education.

1965 On July 10, Radio Seychelles began broadcasting from a studio at Union Vale.

1966 Following the appointment of a station manager, broadcasting time at Radio Seychelles was increased to 4 and a half hours on week days. Local announcements were broadcast in English and Creole.

1971 On May 30 an explosion destroyed the transmitters of Radio Seychelles.

1977 The hours of broadcasting at Radio Seychelles were increased to 65 hours a week. The station received its first broadcasting van which made it possible to do live programs from various places around Mache.

1992 The Seychelles Broadcasting Corporation (SBC) was created a public broadcasting service.

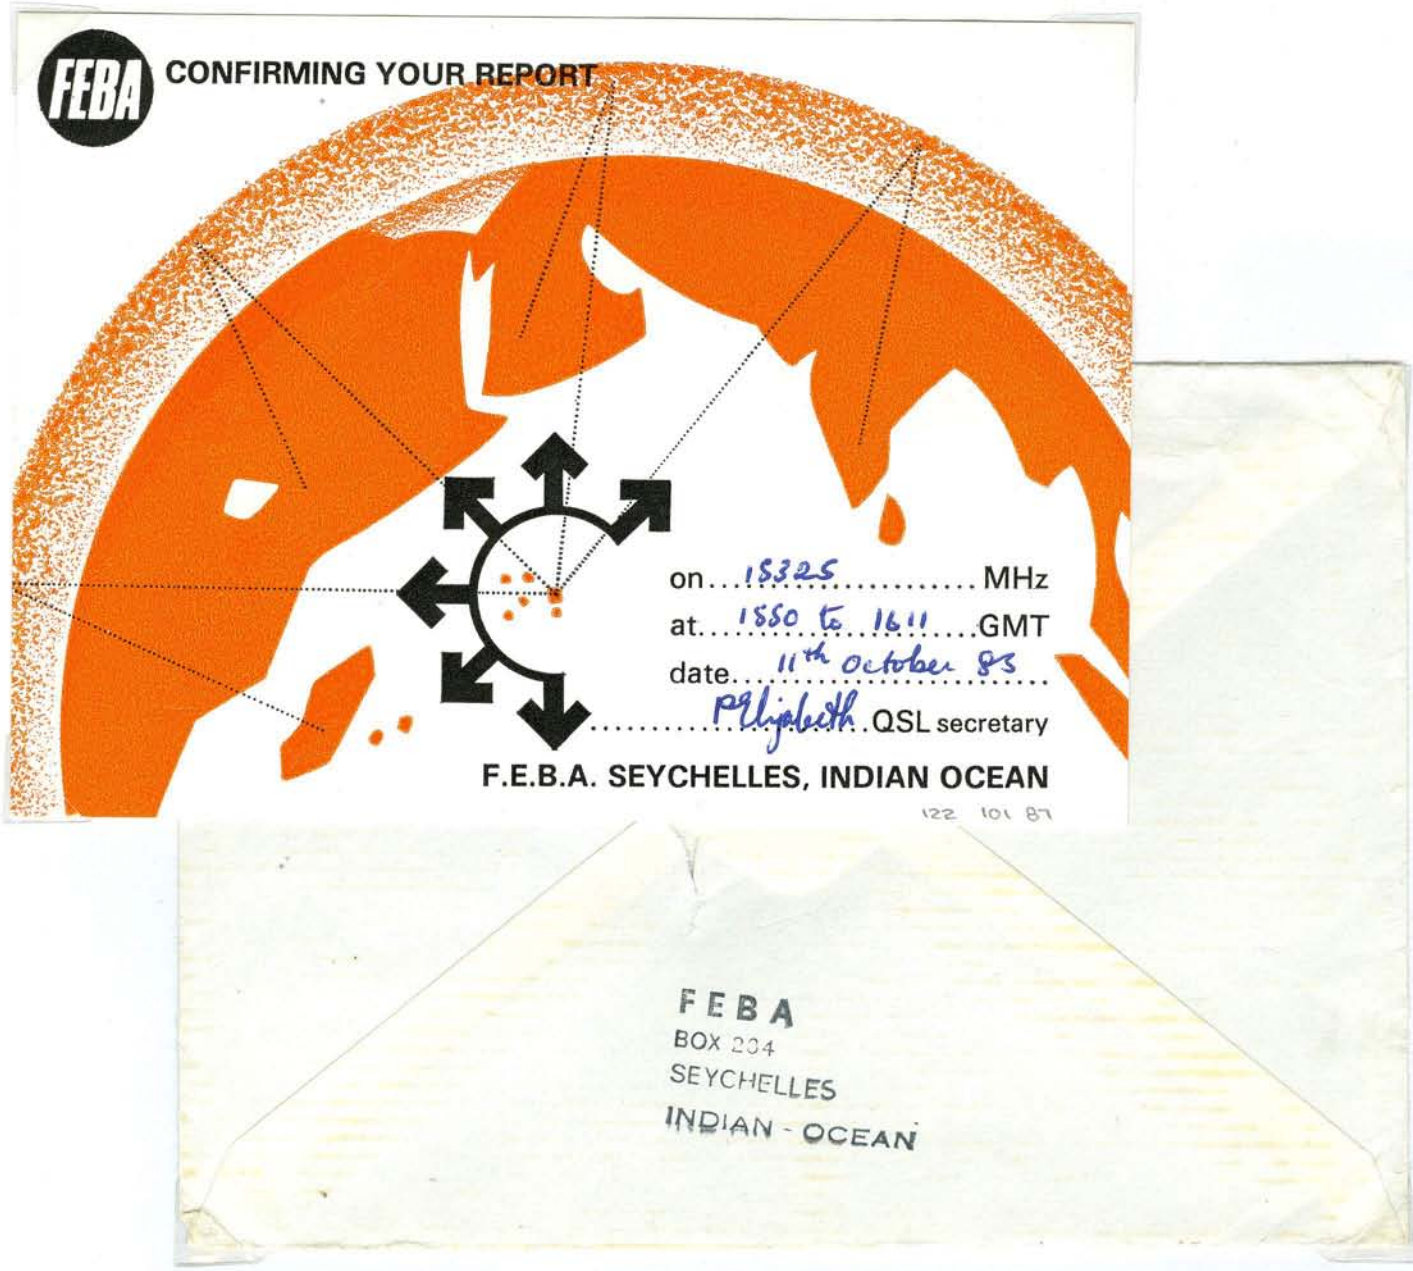
1997 Paradise FM, the FM radio service of the SBC, was launched to complement the AM radio service.

Radio Seychelles, ZCQ3, broadcasts from Seychelles in the Indian Ocean on 1368 kHz. The studio and control room of the station are featured on a postage stamp that was issued in 1983 for World Communications Year.

The Far East Broadcasting Association (FEBA) made its first test transmission from Seychelles on October 8, 1969. The station's regular Christian programs started in May 1970. Due to rising costs and aging equipment, FEBA closed the station on March 30, 2003. The last transmission was aired on March 29.

I received this FEBA verification card from Seychelles to confirm my reception report of a broadcast I heard on October 11, 1983, World Communications Year, on 15325 kHz at 1550 GMT.

W.S. Richards in Saskatoon, Saskatchewan, received this envelope by surface mail from the FEBA office in Seychelles in the spring of 1980.



SIERRA LEONE

In 1934, a wired broadcasting service, known as a rediffusion system, was started in Freetown. A central wireless station received broadcasts from around the world and distributed the signal through telephone wires to receiving sets or loudspeakers in the homes of subscribers. The Sierra Leone Broadcasting Service (SLBS) started in 1955 with a grant from the Colonial Development and Welfare Fund.

I first heard the SLBS on shortwave on Thursday night, August 26, 1983, during World Communications Year. The signal on 5980 kHz travelled about 7250 km to reach me in Ottawa when I tuned in at 6:06 p.m., or 2206 UTC. It was 10:06 p.m. in Freetown. After the news in English, including recent initiatives of the President, there was a program of local music with station identifications and time checks. This was followed by a request program where the announcer read letters from listeners and played popular songs for birthdays. He mentioned one for Mom and Dad, and another for Eva at 71 Barrack

Official Stamp

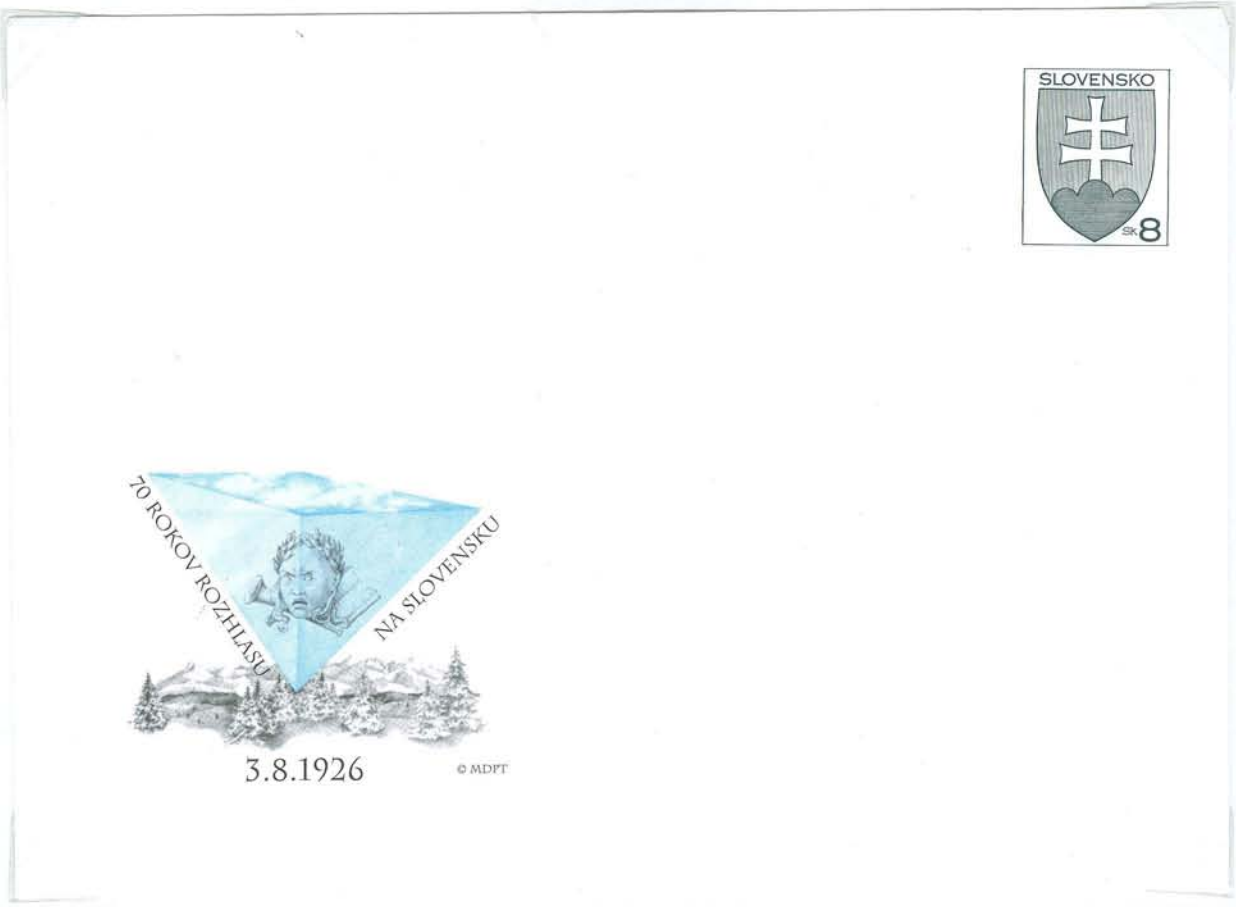
Excited to hear Freetown for the first time, I mailed a detailed reception report to the station with return postage. Enclosed as gifts were a selection of used Canadian postage stamps, promotional stickers from some Canadian cities, and a poster for Commonwealth Day. Ten years later, in the fall of 1993, this verification card arrived in the mail from Freetown to confirm my reception report.

SLOVAKIA

1923 The radio company Radiojournal was established in Prague. It obtained monopoly rights for the creation of radio programs in the Czechoslovak Republic.

1925 The first test of radio broadcasting in Slovakia was made by postal technicians in Haniska with a modified radiotelegraph transmitter.

1926 On August 3rd, the Radiojournal company started regular broadcasts from Bratislavia in a temporary studio at Government House. The twice a week programs were broadcast with a transmitter located at the police headquarters.



The 70th anniversary of radio broadcasting in Slovakia was commemorated on August 3, 1996, with this postal stationary.

Adventist World Radio (AWR), established in 1971, is the international broadcasting service of the Seventh-day Adventist Church. In January 1994, AWR leased state owned shortwave facilities in Rimavska Sobota, Republic of Slovakia, with regular programs since March 1994. The transmitter facilities at Velke Kostolany in Slovakia were added in September 1994, and discontinued after October 1996.

AWR produced special QSL stamps to confirm the reception reports of listeners around the world who heard broadcasts from the transmitters in Slovakia. Rimavska Sobota: AWR-RS08, AWR-RS09, AWR-RS10. Velke Kostolany: AWR-VK02.

AWR produced three promotional stamps in 1996 to celebrate 25 years of broadcasting.

SOLOMON ISLANDS

1944 WVUQ of the Armed Forces Radio Service was the first radio station in the Solomon Islands at Guadalcanal.

1952 The Solomon Islands Broadcasting Service was inaugurated in September, and radio station VQ0 started regular broadcasting on 1030 kHz.

1976 The Solomon Islands Broadcasting Corporation (SIBC) was created.

1984 The studio and broadcasting house of the SIBC, along with Radio City, Guadalcanal, were featured on postage stamps issued for the 20th anniversary of the Asia-Pacific Broadcasting Union.

2006 The SIBC headquarters is located at Rove in Honiara, including the studios for the national service, Radio Happy Isles on 1035 kHz, 5020 kHz, and 9545 kHz, and the Wantok FM service on 96.3 MHz.

The two provincial stations of the SIBC are Radio Happy Lagoon on 945 kHz, at Gizo in the Western Province, and Radio Temotu on 1386 kHz, at Lata in Temotu Province.

I first heard the Solomon Islands Broadcasting Corporation (SIBC) at 1950 m on the Cardinal Divide in the Rocky Mountains. After the 20th annual convention of the Canadian International DX Club, in Edmonton, about a dozen members drove to our DXpedition site 400 km west of the city. Far from any electrical noise, our campsite in the mountains was a great place to listen for distant radio stations.

It was 01:25 in the morning Mountain time on Tuesday, August 31, 1981, when I discovered the SIBC. While swatting giant Rocky Mountain mosquitos that ventured into the tent, I heard the end of a music program, a time check for half past 6, and local news. The New Zealand High Commissioner had completed a 5 day tour of the Solomon Islands. In sports news, 3 boys and 3 girls qualified for the 800 m. On the international scene, it was the 2nd anniversary of Solidarity in Poland. I also listened to shipping news for the region and a job advertisement at the SIBC.

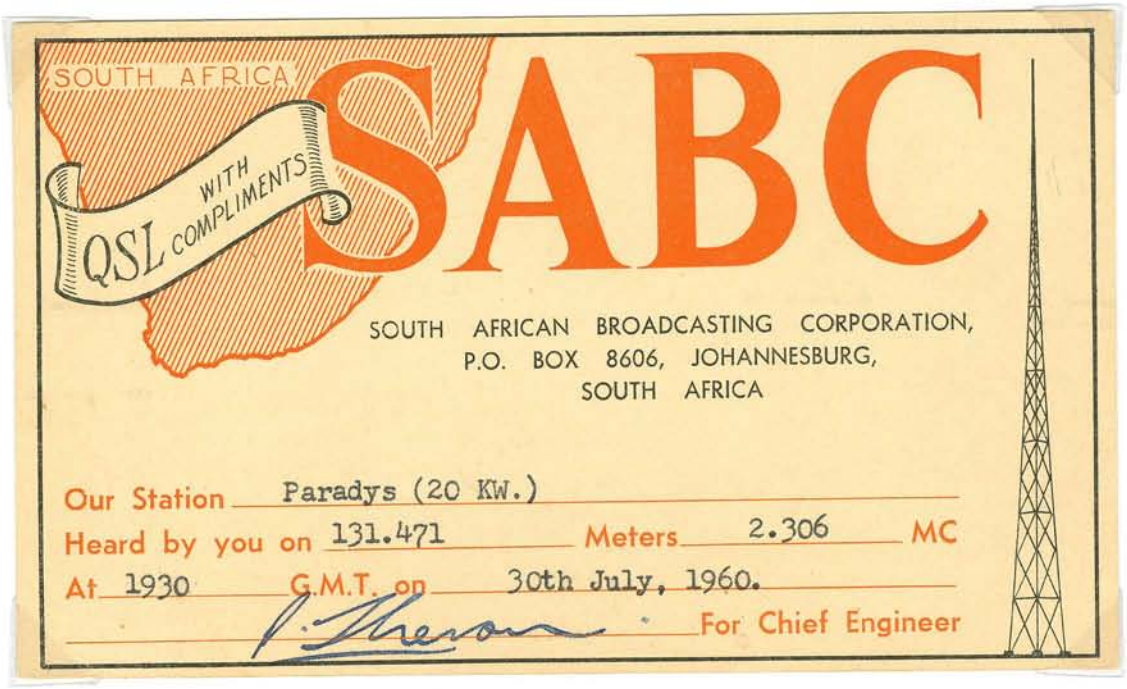
My September letter made it to Honiara, and these verification cards arrived in the mail in late October from the SIBC to confirm my reception report of the broadcasts on 5020 and 9545 kHz.

SOUTH AFRICA

The first radio broadcasts in South Africa were made in 1923, and regular programs started on July 1, 1924. The South African Broadcasting Corporation (SABC) was formed in 1936.

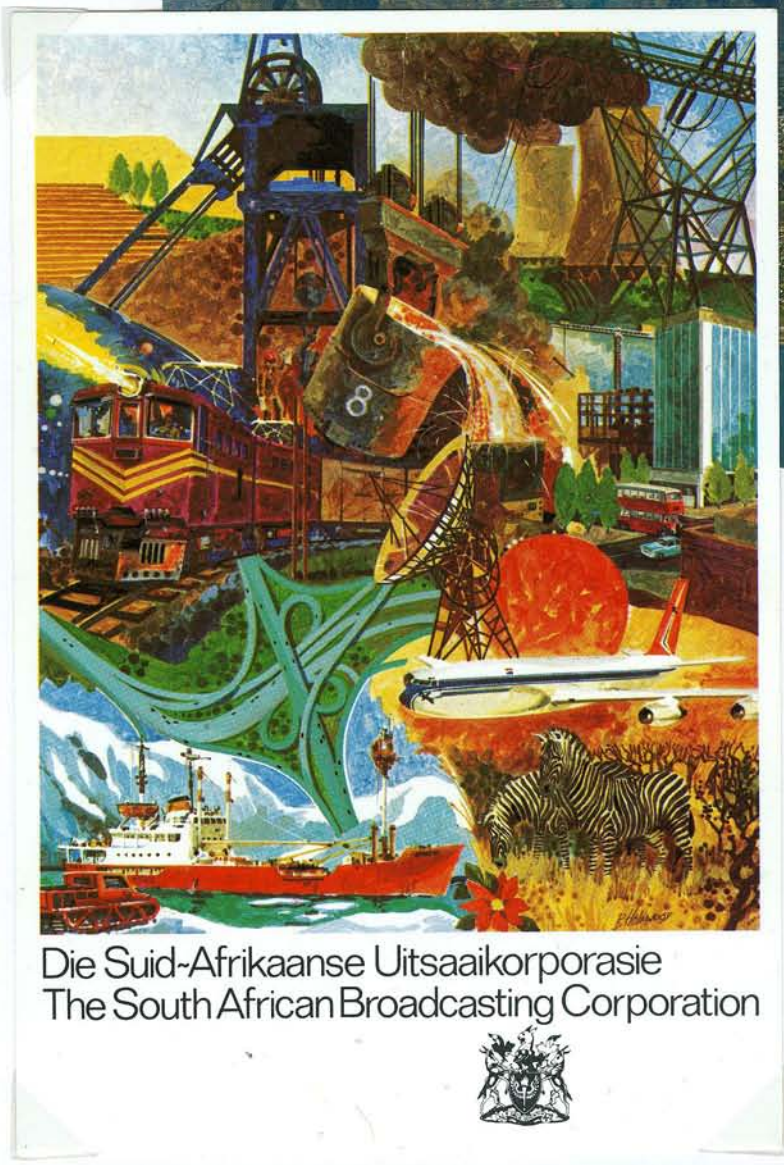
Anthony Manne in Port Elizabeth, South Africa, received this verification card in the mail to confirm his reception report of a broadcast from the SABC station at Paradys on 2.306 MC at 1930 GMT on July 30, 1960.



The 50th anniversary of radio broadcasting in South Africa was celebrated in 1974 with a commemorative postage stamp.

Radio RSA, commissioned in 1966 as the external service of the South African Broadcasting Corporation, broadcast to the world from the H.F. Verwoerd station at Bloemendal, near Meyerton.

Top: This verification card arrived in the mail from the Voice of South Africa offices in Johannesburg to confirm my reception report of a Radio RSA broadcast I heard on 11730 kHz at 0200 GMT on September 28, 1982.



Bottom: I also heard the domestic service of the SABC on the shortwave frequency of 4835 kHz on November 10, 1983, at 0200 GMT during World Communications Year.

Top: On December 22, 1986, I heard Radio Orion, one of the domestic services of the SABC, on 3320 and 3955 kHz between 0218 and 0248 UTC.

Thank you for your report on the reception of our

SPAIN

1923 Radio Iberica in Madrid, the first radio station in Spain, started broadcasting in September.

1924 Radio Espana, EAJ2, opened in Madrid in September. On the Canary Islands, Radio Club Tenerife started regular broadcasting, and received the call letters EAR-58 in 1925/6.

1931 Escuela Radio Maymo, a school of radio instruction, was founded.

1937 Radio Nacional de Espana, the Spanish national radio service, was founded. Since 1973 it has formed part of the public media organization Radiotelevision Espanola (RTVE).

In 1967, mail from the Madrid office of Escuela Radio Maymo used a meter stamp that included the school's radio towers and antenna logo in the design.

Anthony Manne in South Africa received this verification postcard in the mail from Madrid in 1961 to confirm his reception report of a Radio Nacional de Espana broadcast.

In 1964, Spain issued a set of postage stamps to commemorate twenty-five years of peace in the country. One stamp in the set was devoted to radio and television in Spain.

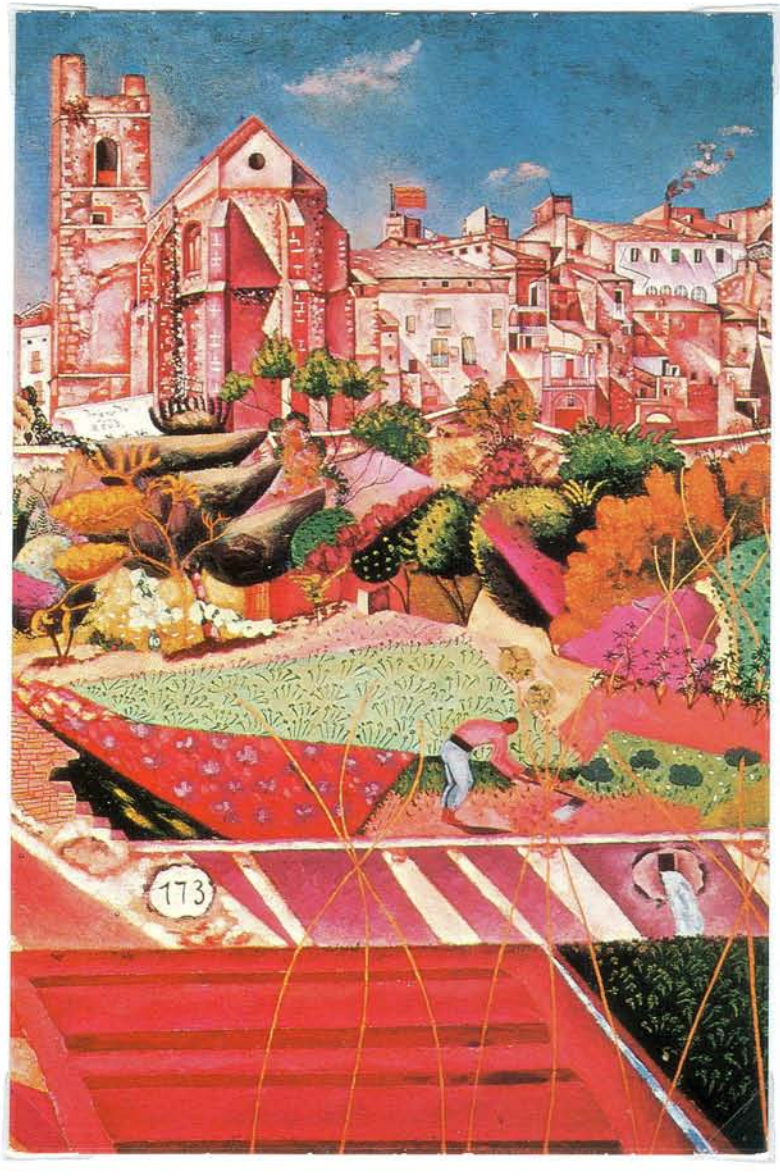
Although a postage stamp has not yet been issued to honour a radio station in the country, promotional meter stamps are used by Spanish stations, including Radio Nacional.

Radio Valencia, a member station of Sociedad Espanola de Radiodifusion (SER), celebrated its 50th anniversary in 1981 with a commemorative postal cancellation.

The SER (Spanish Society of Broadcasting) controls four radio networks in Spain - news, popular music, contemporary adult, and Spanish music.

The 50th anniversary of Radio Bilbao in 1983 was also promoted with a special postal cancellation as the 50th anniversary of radio broadcasting in Vizcaya, one of the Basque provinces of northern Spain. A commemorative postal cancellation was used for the 60th anniversary of Radio Coruna in 1994.

Radio Exterior de Espana (REE) was the very first international radio station I heard. It was the second radio station to reply to the reception reports I mailed around the world after my first week of shortwave listening.



On November 9, 1980, at 0150 GMT, I discovered REE on 11880 kHz while learning to use my new Yaseu FRG-7 receiver. By chance I had tuned to an English program about shortwave listening, and learned that this was called DXing. The program included a discussion of the difficulty in obtaining QSL cards from ham radio operators in the Soviet Union, and a guide to English language broadcasts prepared by a shortwave listener in Germany.

Wow! What a thrill to discover a radio signal from Spain! This verification card arrived by airmail 54 days after I mailed my letter to P.O. Box 150039 in Madrid.

With the help of a Spanish language guide, I wrote a Spanish reception report for a broadcast I heard from the Radio Exterior de Espana station on the Canary Islands. Along with my report, I sent a cassette tape recording of the Spanish program I had listened to. I also enclosed the correct amount of mint stamps from Spain for return postage, two stickers from Canadian radio stations, a selection of used Canadian postage stamps, and a brochure about the Town of Almonte where I lived.

In only 37 days after I sent my package to Madrid, this verification card arrived in the mail to confirm my report of the broadcast from the Canary Islands on July 30, 1985, at 2200 UTC on 15365 kHz.

Did Spain ever operate a radio station in the Spanish Sahara? This was the territory of Western Sahara in Africa ruled by Spain from 1884 to 1975. Two postage stamps were issued in 1964 that feature a microphone and symbolic radio waves. The Spanish Sahara was divided in 1976 between Mauritania and Morocco. Mauritania later gave up its claim to the territory after an unsuccessful war with indigenous Sahrawi tribes. Morocco is still at war with the Sahrawi, and the territory remains under dispute.

STATE PRINTING CORPORATION, SRI LANKA

On Monday morning, August 22, 1983, the signal from the Sri Lanka Broadcasting Corporation travelled about 13700 km to reach me in Ottawa. It was 6:52 a.m. when I chanced upon the station on 11835 kHz. Our new baby was sick during the night, and I was up early to comfort her. While rocking her back to sleep, I turned on the radio and discovered a signal in English I hadn't heard before.

At the top of the hour, after a program of relaxing music, was a clear station identification. I was tuned to Sri Lanka! I listened to the music and announcements of the evening program until the station signed off just past the half hour, at 5:31 p.m. local time in Sri Lanka.

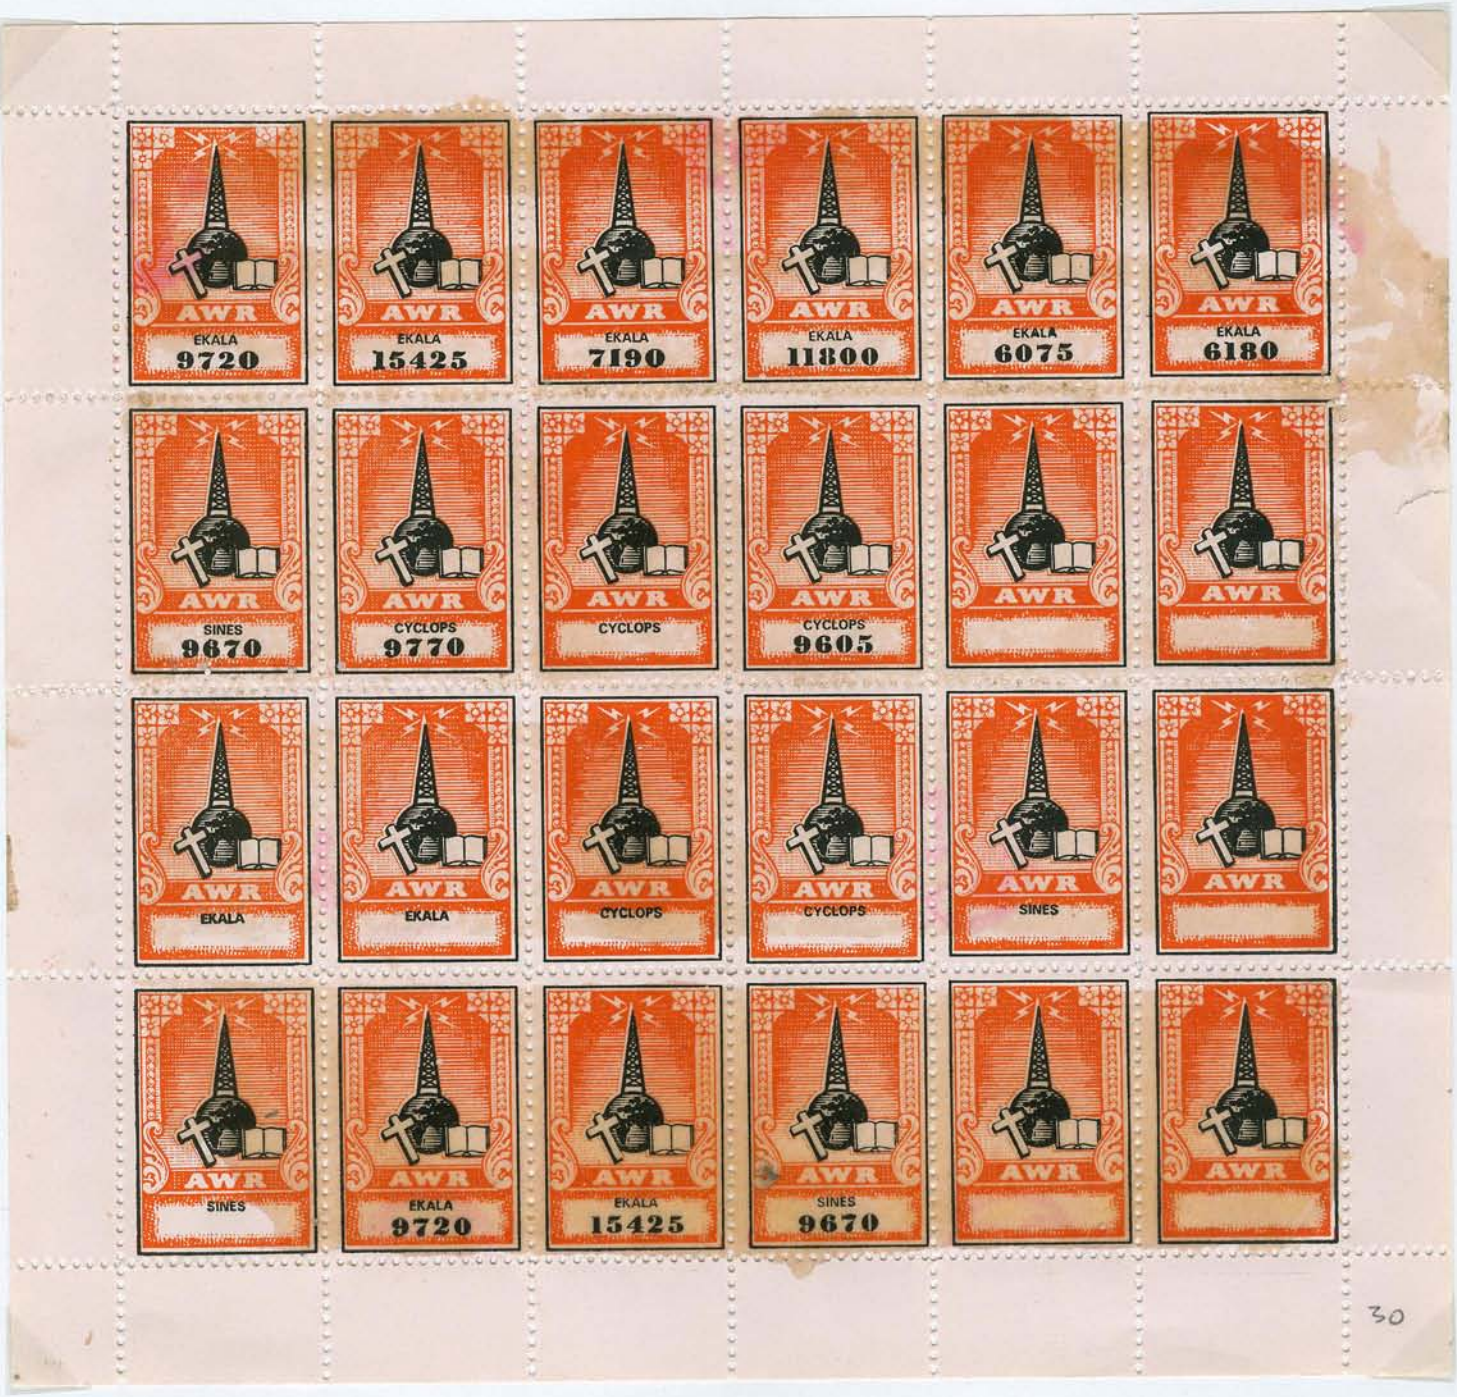
Two verification cards arrived in the mail from Colombo in reply to my original reception report and a second letter. Sri Lanka was the 83rd country I'd confirmed.

Established in 1971, Adventist World Radio (AWR) is the international broadcasting service of the Seventh-day Adventist Church. AWR created special QSL stamps to confirm the reception reports of listeners who heard programs from the transmitters of the Sri Lanka Broadcasting Corporation (SLBC).

Collectible QSL stamps were designed for AWR Week, December 4-11, 1977, to commemorate the 30th anniversary of the Voice of Prophecy Bible Correspondence Schools in Asia and Europe. During the anniversary week, orange QSL stamps were introduced for use with the first annual DX contest over the AWR program Radio Monitors International. The program was broadcast from the Ekala transmitters of the SLBC. For the second DX contest on September 24, 1978, AWR introduced mauve stamps. Greenish blue stamps were issued for the third DX contest on July 1, 1979.

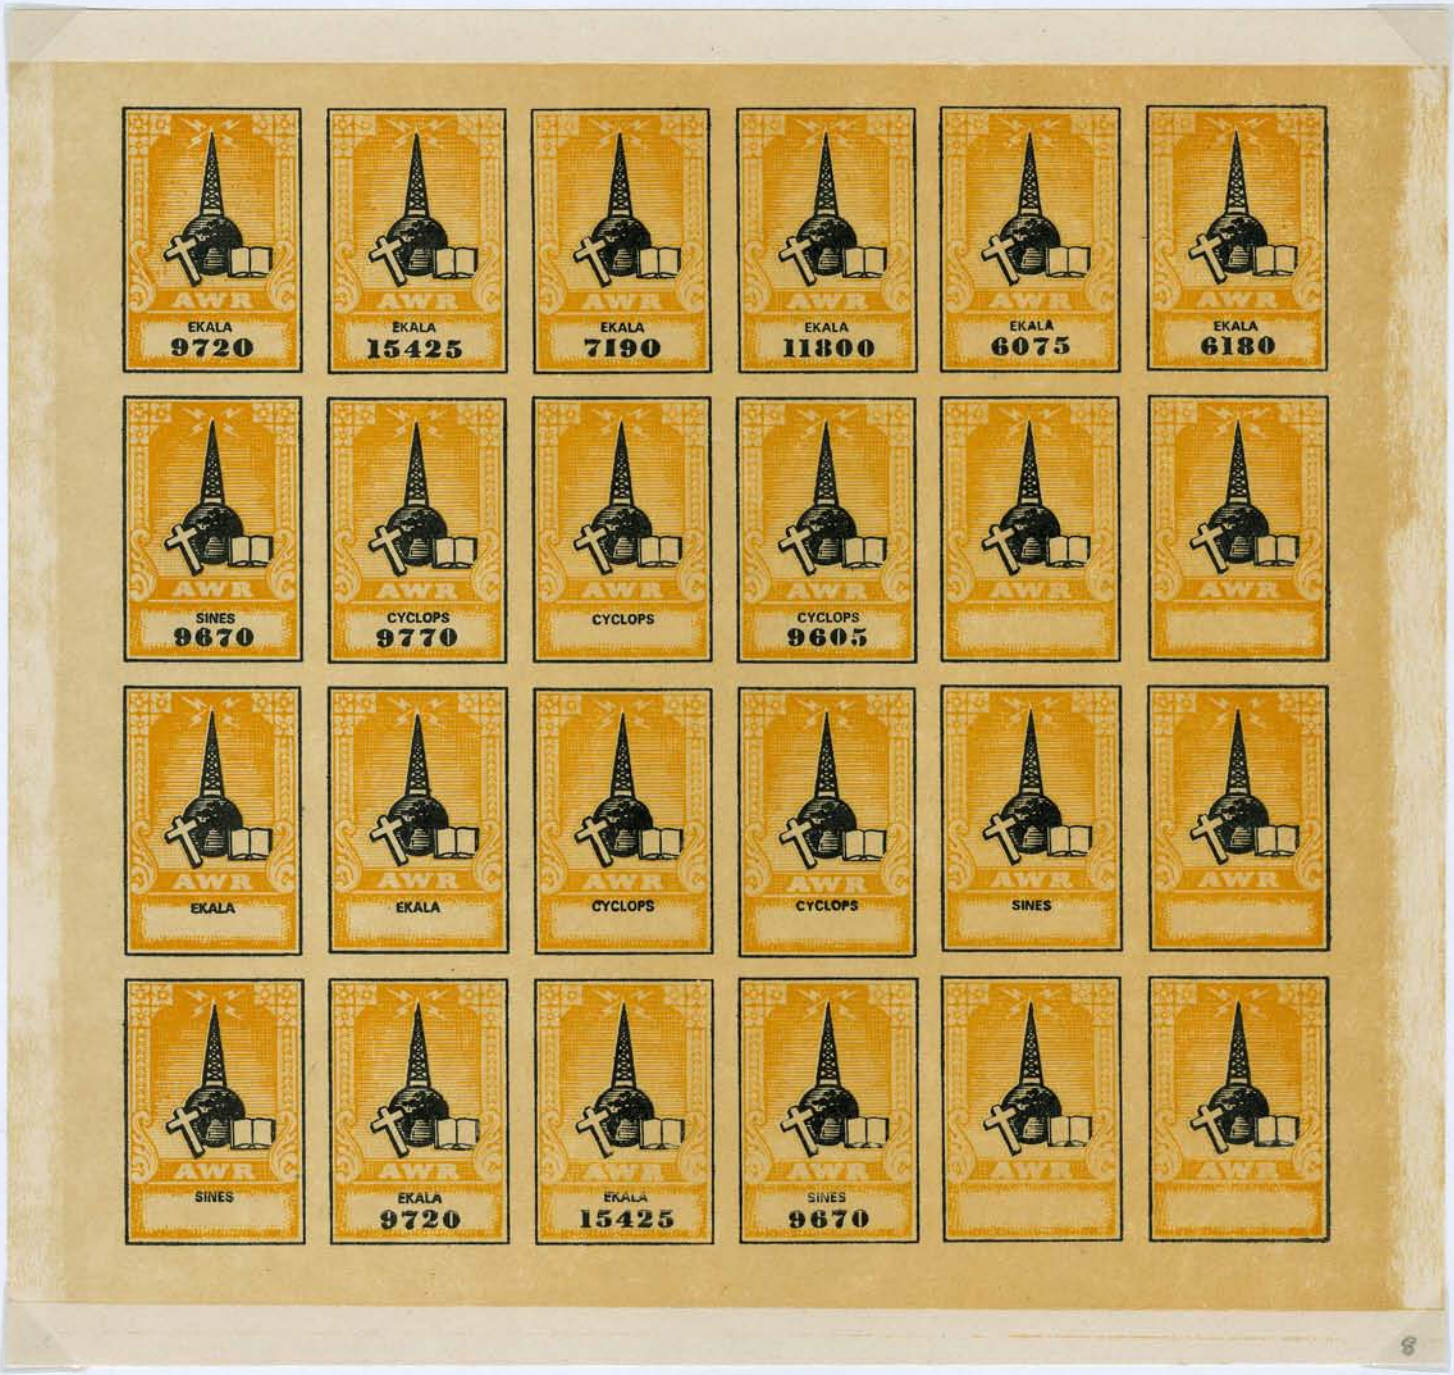
The QSL stamps were designed by the staff artist at the Oriental Watchman Publishing House in Poona, India. This printing factory was located with the studios of AWR-Asia at the head office campus of the Church, which served ten countries of southen Asia. AWR QSL stamps were intended primarily for mounting on special QSL certificates, but were also attached to to do-it-yourself QSL cards and, occasionally, for special purposes, to regular AWR QSL cards.

AWR QSL stamps were printed in Ganges orange for the first annual DX contest on the program Radio Monitors International, December 4-11, 1977. The program was broadcast from Sri Lanka on the Ekala transmitters of the Sri Lanka Broadcasting Corporation.



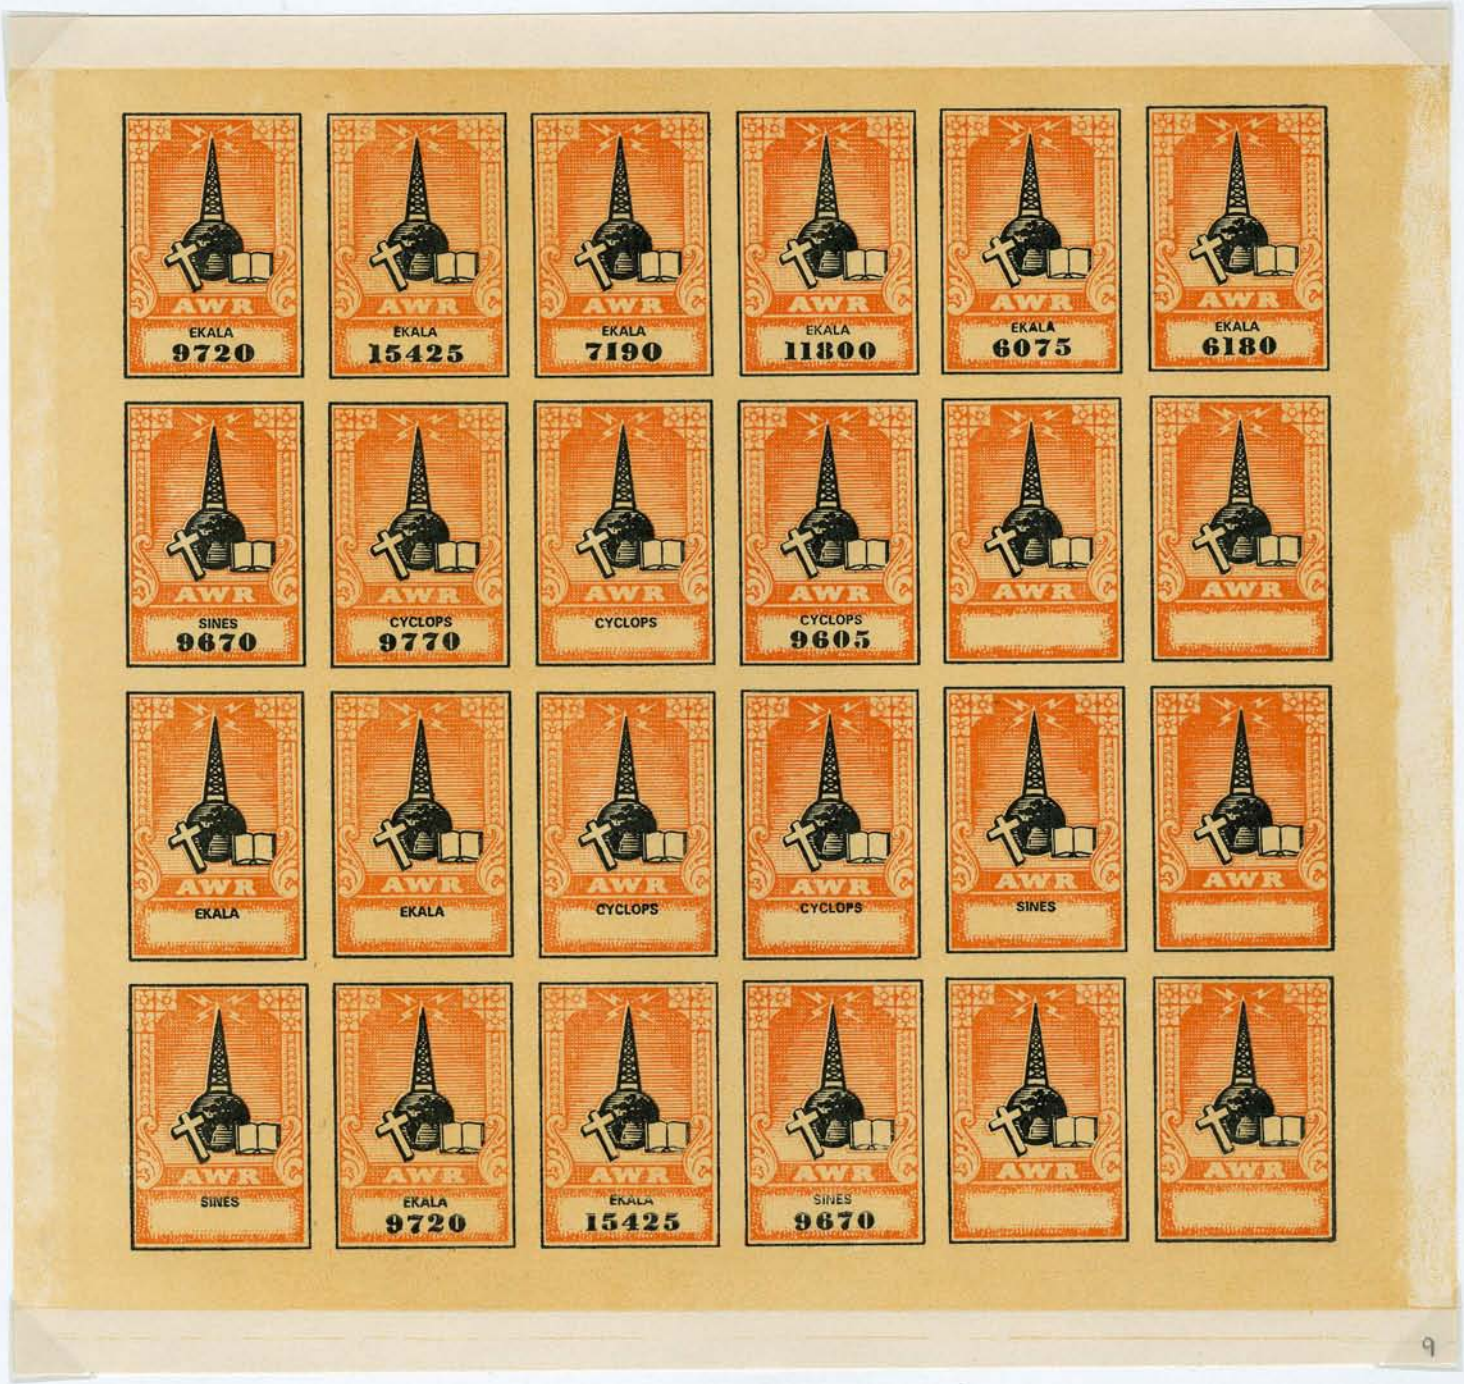
The QSL stamps produced by AWR were intended to be self-adhesive. When they were new, this worked nicely. However, because of the hot climate, the adhesive deteriorated over time at the AWR offices in Poona, India, and even darkened the colour of the stamps. Each sheet of twenty-four stamps was perforated by a hand operated machine.

Proof sheets of AWR QSL stamps were pulled on a hand press to determine best colours at the Oriental Watchman Publishing House in Poona, India. This printing factory was located with the studios of AWR-Asia at the head office campus of the Church, which served ten countries of southern Asia.



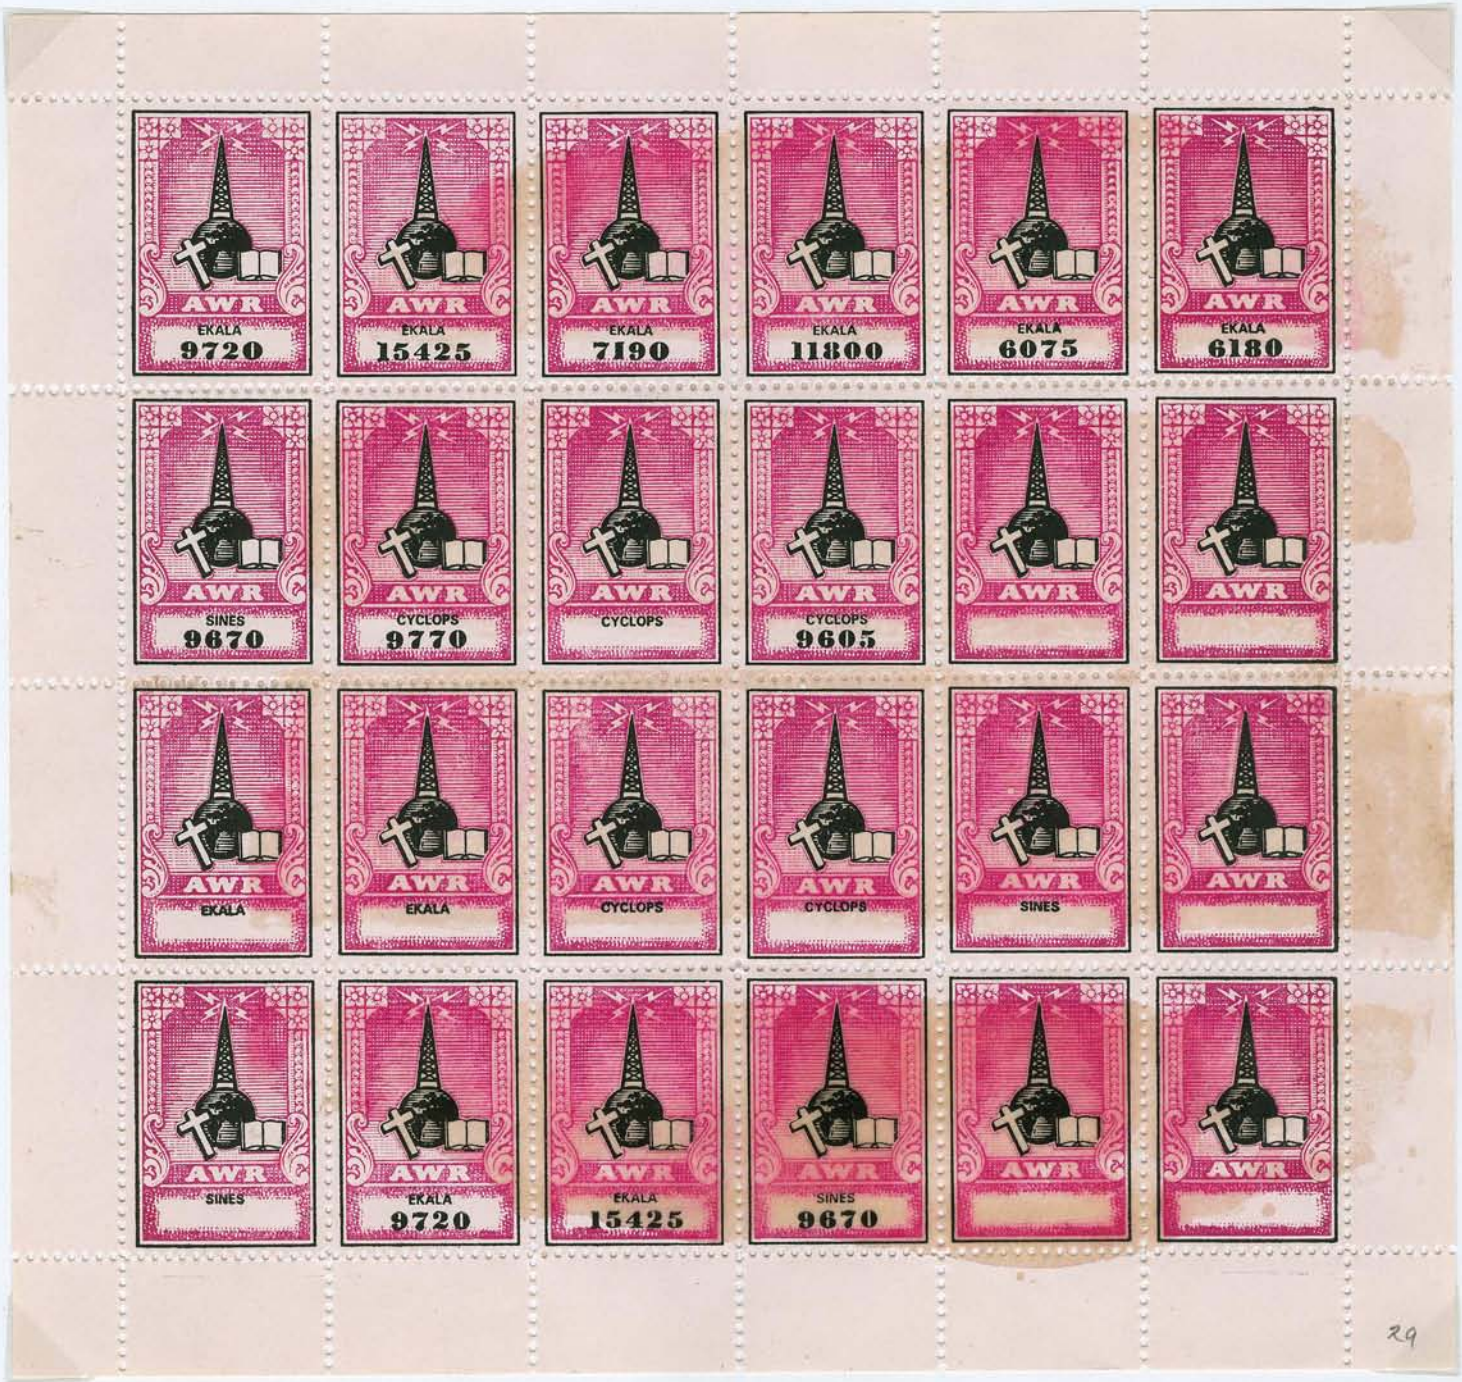
Although a yellow AWR QSL stamp was never produced for the three AWR DX contests in 1997, 1978, and 1979, a proof sheet in yellow was made to consider this colour.

Proof sheets of AWR QSL stamps were pulled on a hand press to determine best colours at the Oriental Watchman Publishing House in Poona, India. This printing factory was located with the studios of AWR-Asia at the head office campus of the Church, which served ten countries of southern Asia.



The AWR QSL stamps were designed by the staff artist at the Poona printing factory. The design features a radio tower on a globe which shows the eastern hemisphere. In front of the globe, to the left, is a cross. To the right is an open bible. Scrollwork and ornamental framing provide a decorative border.

AWR QSL stamps were printed in mauve for the second annual DX contest on the program Radio Monitors International, September 24, 1978. The program was broadcast from Sri Lanka on the Ekala transmitters of the Sri Lanka Broadcasting Corporation.



The mauve AWR QSL stamps introduced in 1978 were intended primarily for mounting on a special QSL certificate printed in black. A certificate in Indian Butterfly blue was printed for the orange QSL stamps introduced in 1977.

Proof sheets of AWR QSL stamps were pulled on a hand press to determine best colours at the Oriental Watchman Publishing House in Poona, India. This printing factory was located with the studios of AWR-Asia at the head office campus of the Church, which served ten countries of southern Asia.

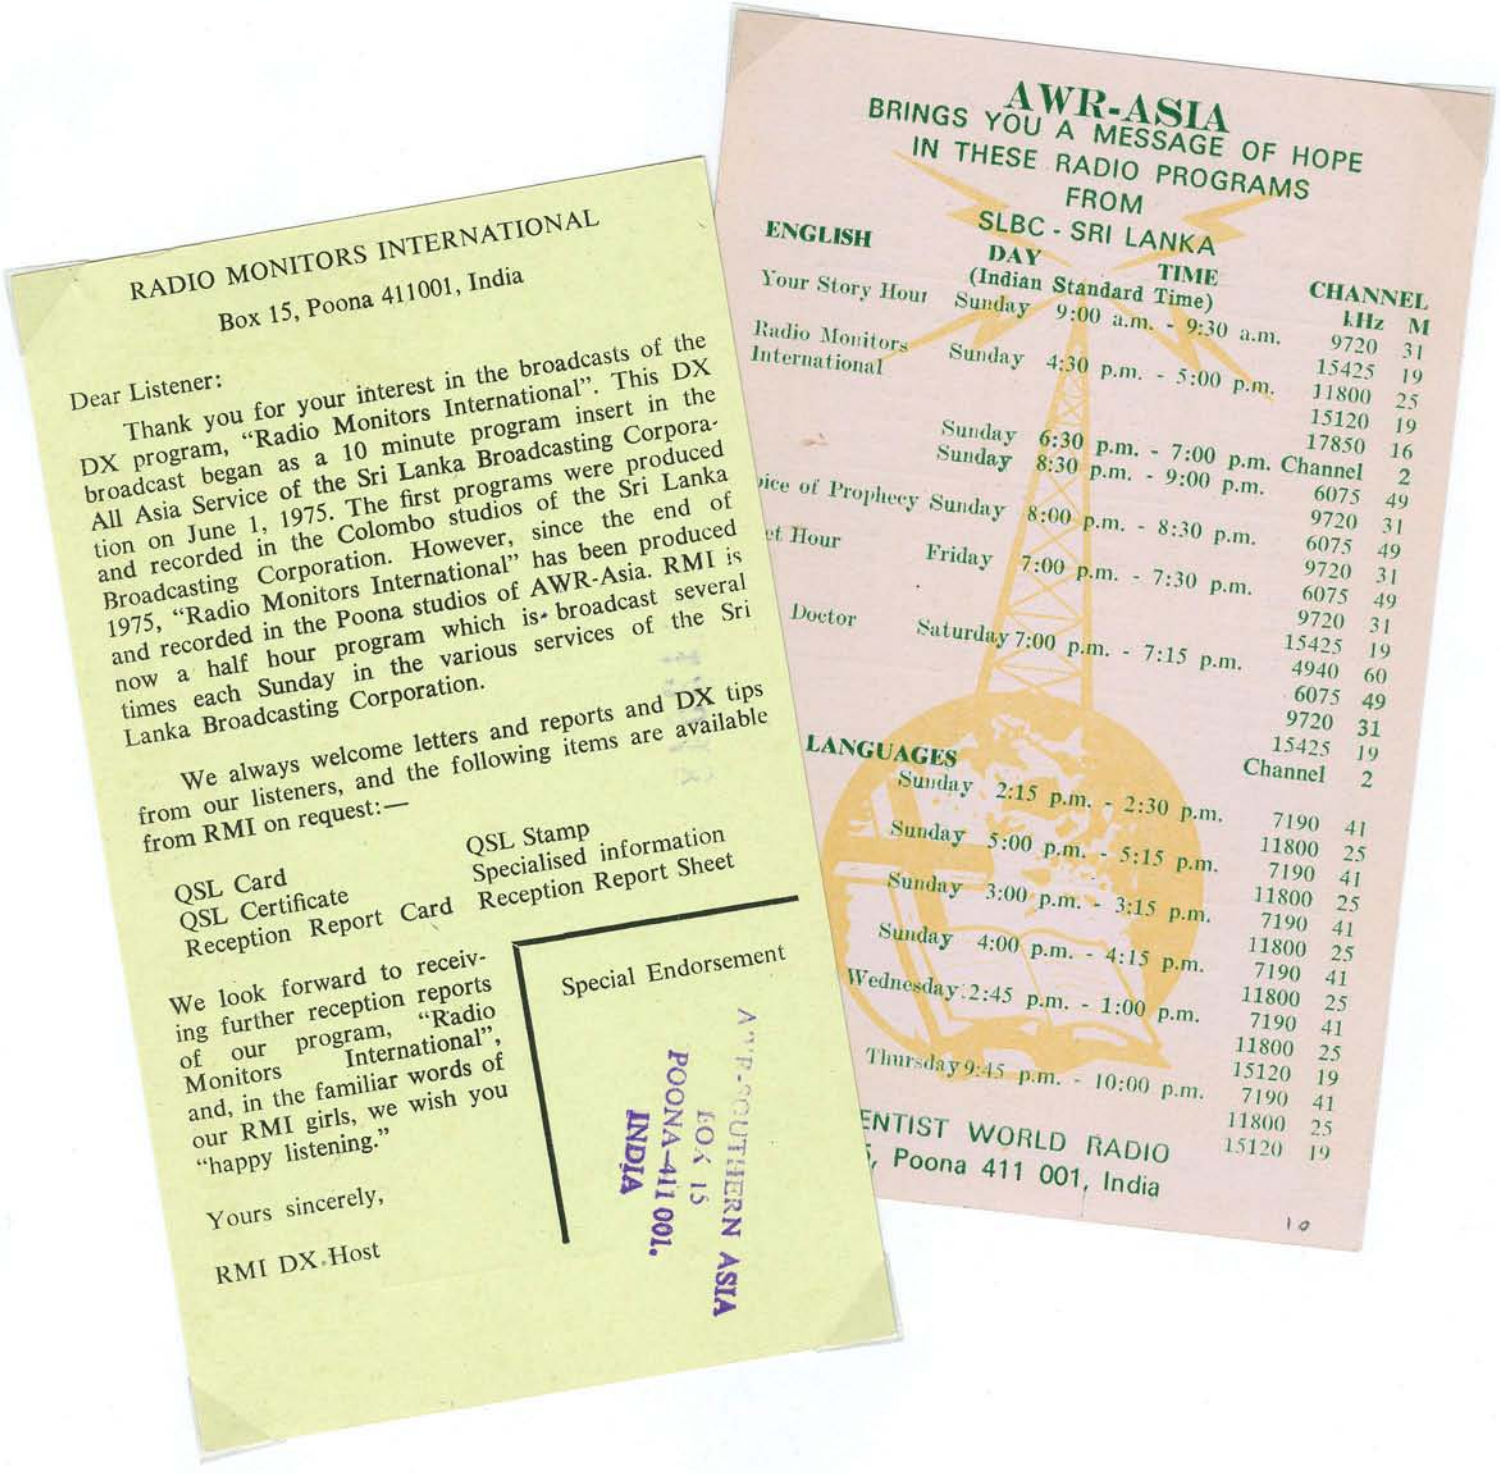
AWR's DX program, Radio Monitors International, started on June 1, 1975, as a ten minute feature of the All Asia Service of the Sri Lanka Broadcasting Corporation (SLBC). It was produced and recorded in the Colombo studios of the SLBC, and broadcast from the Ekala transmitters.



RADIO MONITORS INTERNATIONAL

Box 15, Poona 411001, India

Dear Listener:

Thank you for your interest in the broadcasts of the DX program, "Radio Monitors International". This DX broadcast began as a 10 minute program insert in the All Asia Service of the Sri Lanka Broadcasting Corporation on June 1, 1975. The first programs were produced and recorded in the Colombo studios of the Sri Lanka Broadcasting Corporation. However, since the end of 1975, "Radio Monitors International" has been produced and recorded in the Poona studios of AWR-Asia. RMI is now a half hour program which is broadcast several times each Sunday in the various services of the Sri Lanka Broadcasting Corporation.

We always welcome letters and reports and DX tips from our listeners, and the following items are available from RMI on request:—

QSL Card
QSL Certificate
Reception Report Card
QSL Stamp
Specialised information
Reception Report Sheet

We look forward to receiving further reception reports of our program, "Radio Monitors International", and, in the familiar words of our RMI girls, we wish you "happy listening."

Yours sincerely,

RMI DX.Host

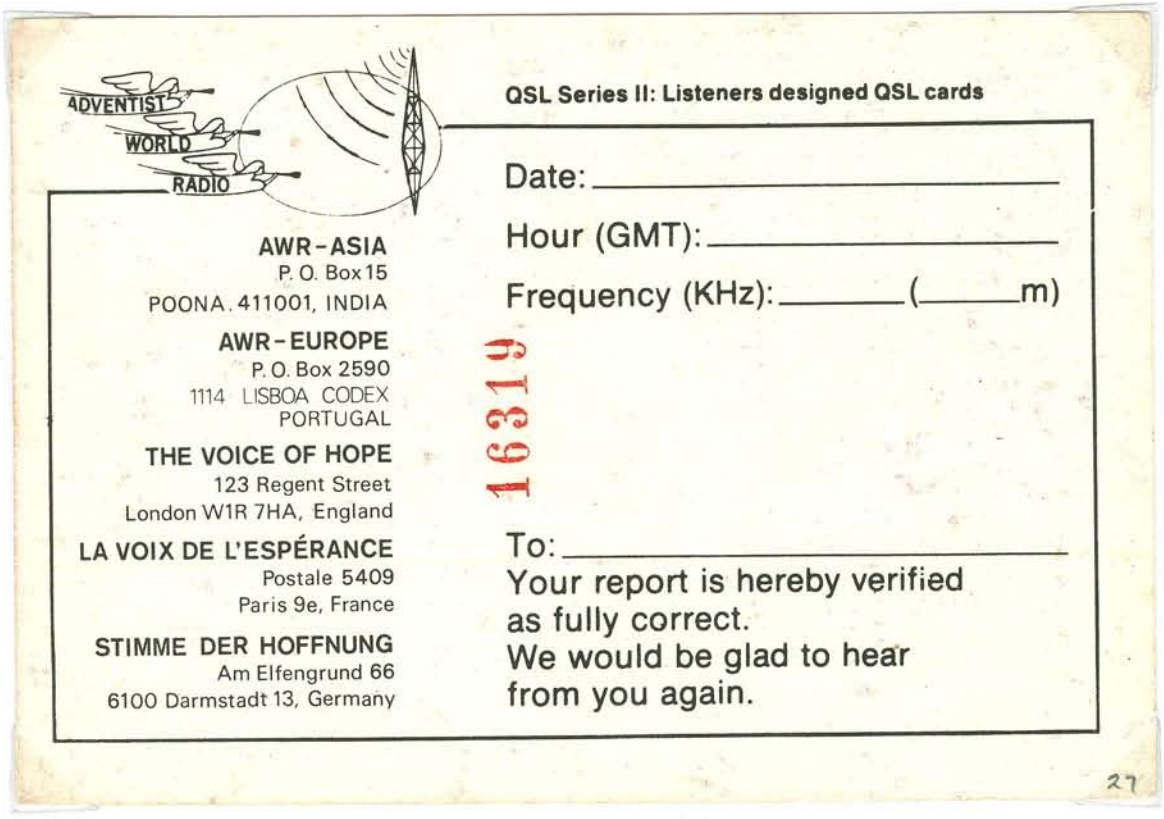
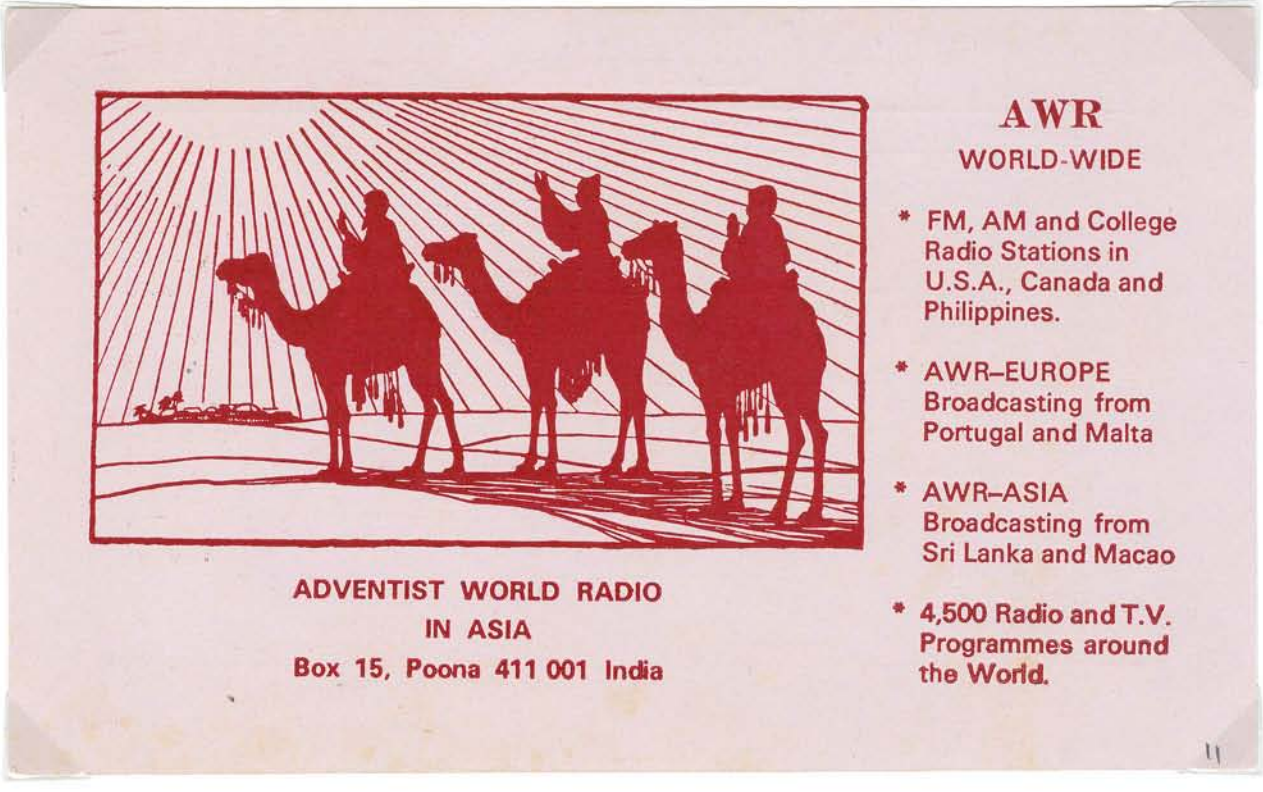
ENTIST WORLD RADIO
, Poona 411 001, India

By the end of 1975, Radio Monitors International was a half hour program, created in the Poona, India, studios of AWR-Asia, and broadcast several times each Sunday from the Ekala transmitters in Sri Lanka.



In the 1970s, listeners worldwide could hear AWR programs broadcast on shortwave from Sri Lanka, as well as broadcasts on AM, shortwave, and FM stations in other countries.



Top: In 1981, the Radio Monitors International program of the AWR was broadcast from the Ekala transmitters of the Sri Lanka Broadcasting Corporation as a half hour feature on Sunday, from 7:30 to 8:00 p.m.

Bottom: When the title AWR-Asia was adopted by the new AWR station on Guam, the original AWR-Asia office in Poona, India, was redesignated as AWR-Southern Asia. The programs broadcast from Sri Lanka were discontinued in late 1988 when the Guam station became operational.

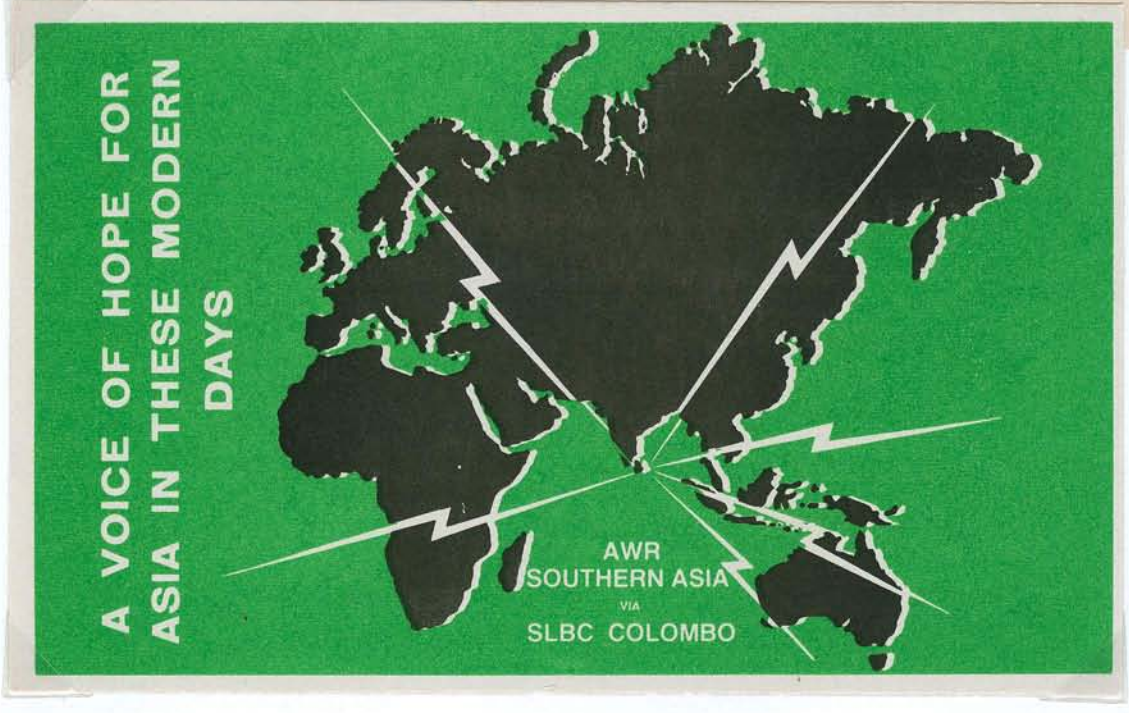
ADVENTIST WORLD RADIO
Box 15, Poona 411 001, India

12



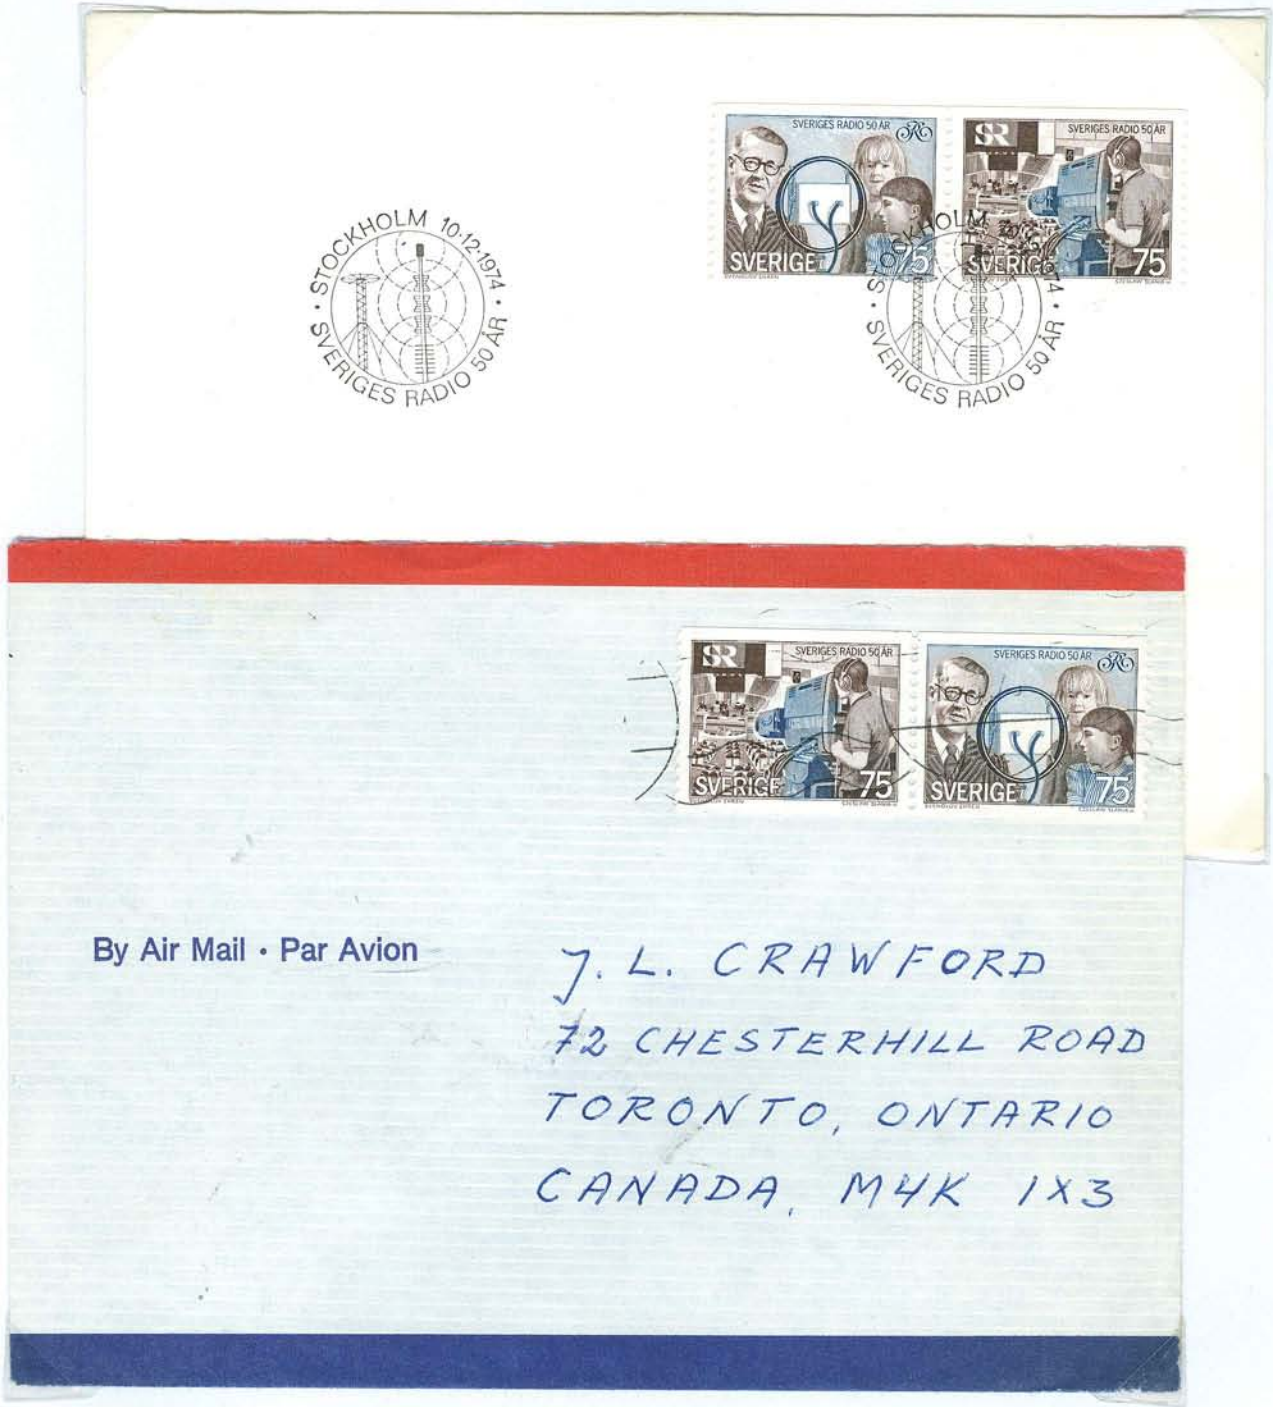
Adventist World Radio (AWR), established in 1971, is the international broadcasting service of the Seventh-day Adventist Church. In 1996, AWR celebrated 25 years of broadcasting.

During the 25th anniversary year, AWR produced a new design of QSL stamps to confirm the reception reports of listeners around the world. The stamps were first used for the 1996 Wavescan DX contest in September. Wavescan is AWR's global DX program with news and features on radio and related subjects.

The stamps were intended primarily for mounting on a special QSL certificate printed in black and blue. Three of the AWR verification stamps in 1996 were available to confirm reports of programs from AWR - Southern Asia, including broadcasts from Sri Lanka.

AWR also produced three promotional stamps to celebrate 25 years of broadcasting in 1996.

SWEDEN

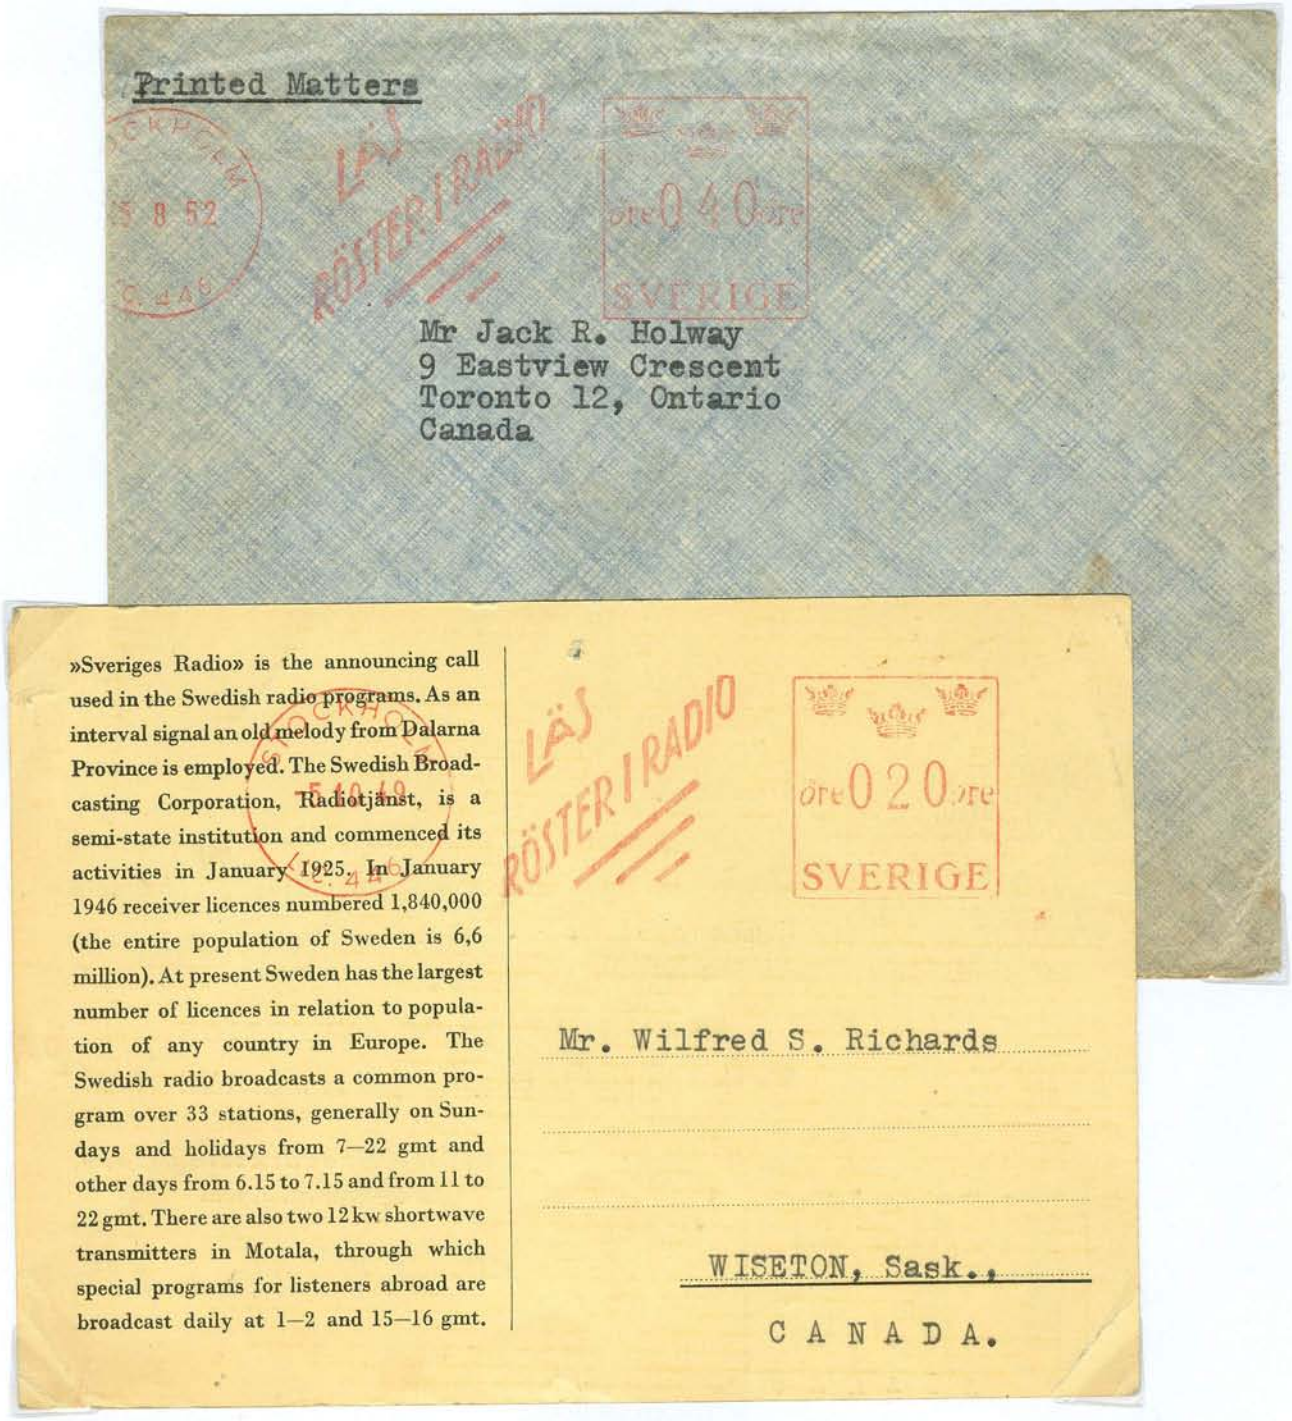


Broadcasting in Sweden was nationalized in 1924. Radiotjanst, the new company created for broadcasting, started regular programs on January 1, 1925. Sven Jerring, the first announcer, was featured on a set of two se-tenant stamps that were issued in 1974 for the 50th anniversary of the Swedish Broadcasting Corporation. His popular program, Children's Letterbox, ran for 47 years.

This 1984 postcard from Sweden, with images of early radio receivers, has a photo of Sven Jerring conducting a radio interview at the Stockholm stadium on July 3, 1942.

The Swedish national longwave radio station at Motala, established in 1927, is featured on a local stamp issued by the Motala budtjanst & lokalpost (1945-47). It was used to prepay the delivery of unsealed letters and printed matter in the town of Motala by the private postal service.

Radio programs were transferred from Stockholm to Motala by telephone line. During broadcasts, the station was identified as 'Stockholm-Motala'. The Motala station operated on 191 kHz until 1962 when broadcasts were moved to Orlunda. The station is now a radio museum with an operating longwave transmitter. This Rundradiomuseum postcard arrived in my mailbox from Sweden with information about the museum's unique collections and displays from the early years of radio to digital broadcasting.



Radio enthusiasts in Canada have been listening for years to broadcasts from Sweden. Top: Radiotjanst airmail envelope of 1952 that arrived in Toronto, Ontario . Bottom: Radiotjanst verification card confirming the reception report of Wilfred Richards, in Wiseton, Saskatchewan, for a program he heard on September 10, 1949, from station SDB-2 on 10780 kHz, 27.83 m.

Facts about Sweden

Sweden has 8 million inhabitants. With an area of 450,000 square kilometres, Sweden is the largest of the Scandinavian states and fourth in size among the European countries. Sweden is a constitutional monarchy. Its foreign policy is one of non-alignment in peacetime so as to be able to remain neutral in the event of war. Thus Sweden is not a member of any military or political bloc but does support all efforts by the United Nations to maintain peace and promote disarmament. Sweden also tries to safeguard the interests of the small nations.

Elijah being taken up to heaven. A painted ceiling by Winter Carl Hansson, 1777—1805, in an old farmhouse near Rättvik.

Among the strangest blossoms of Swedish popular art are the paintings made a hundred years ago by peasant painters in the province of Dalecarlia, in the heart of Sweden. Their motifs were mostly taken from the Old Testament, whose dramatic tales they pictured as happening in their own everyday surroundings. The naive art of the Dalecarlian painters flourished in a geographical isolation which has long since been broken down. Yet in the midst of the busy present the past lives on in Sweden — the country which sends you this greeting from Scandinavia through **RADIO SWEDEN.**

Verification cards mailed to international listeners from Stockholm, to confirm their reception reports of shortwave broadcasts, have always been welcomed by radio enthusiasts. Top: Neil Carleton, Ottawa, Canada, April 5, 1982, on 9695 kHz at 0230 UTC. Bottom: Anthony Manne, Port Elizabeth, South Africa, July 5, 1960, on 11705 kc.

1925 Radiotjanst, the newly created broadcasting company, started radio transmissions.

1939 The external service of Swedish broadcasting began programs for audiences abroad.

1957 Radiotjanst became Sveriges Radio AB, the Swedish Broadcasting Corporation.

1979 Sveriges Radio was organized into a group of companies consisting of Swedish National Radio, Swedish Local Radio, Swedish Television, and Swedish Educational Broadcasting, with the Swedish Broadcasting Corporation as the parent company.

1985 The 60th anniversary of radio broadcasting in Sweden was celebrated in 1985 with a commemorative meter stamp on mail from Radio Sweden International.

A variety of promotional meter stamps have been used on mail from Radio Sweden International (RSI) in Stockholm.

RSI is the external service of Swedish broadcasting with daily programs on shortwave about current events, culture, news, and issues in Sweden.

The 10th anniversary of Narradion Radio in Jonkoping, south central Sweden, was celebrated with a commemorative postal cancellation in 1989. The station also used a promotional postcard for the anniversary that shows the studio and control room.

Golden Hits FM 100.8, a commercial radio station in Stockholm, produced a promotional stamp.

Many communities have commercial radio stations owned by international broadcasting companies. The most well known are Golden Hits FM 100.8, Radio Rix, Classical FM, and Radio Energy.

Private radio attracts 31.4 % of the listening audience in Sweden.

The major broadcasting organization in Sweden is Sveriges Radio which provides public service broadcasting through 4 national channels - P1, P2, P3, P4 - and 26 regional channels across the country.

In Sweden, 76.8 % of the population listens to radio on an average day.

SWITZERLAND

1922 The first broadcasting station in Switzerland was established on August 22 by the Municipality of Lausanne on the Champ-de-l'air.

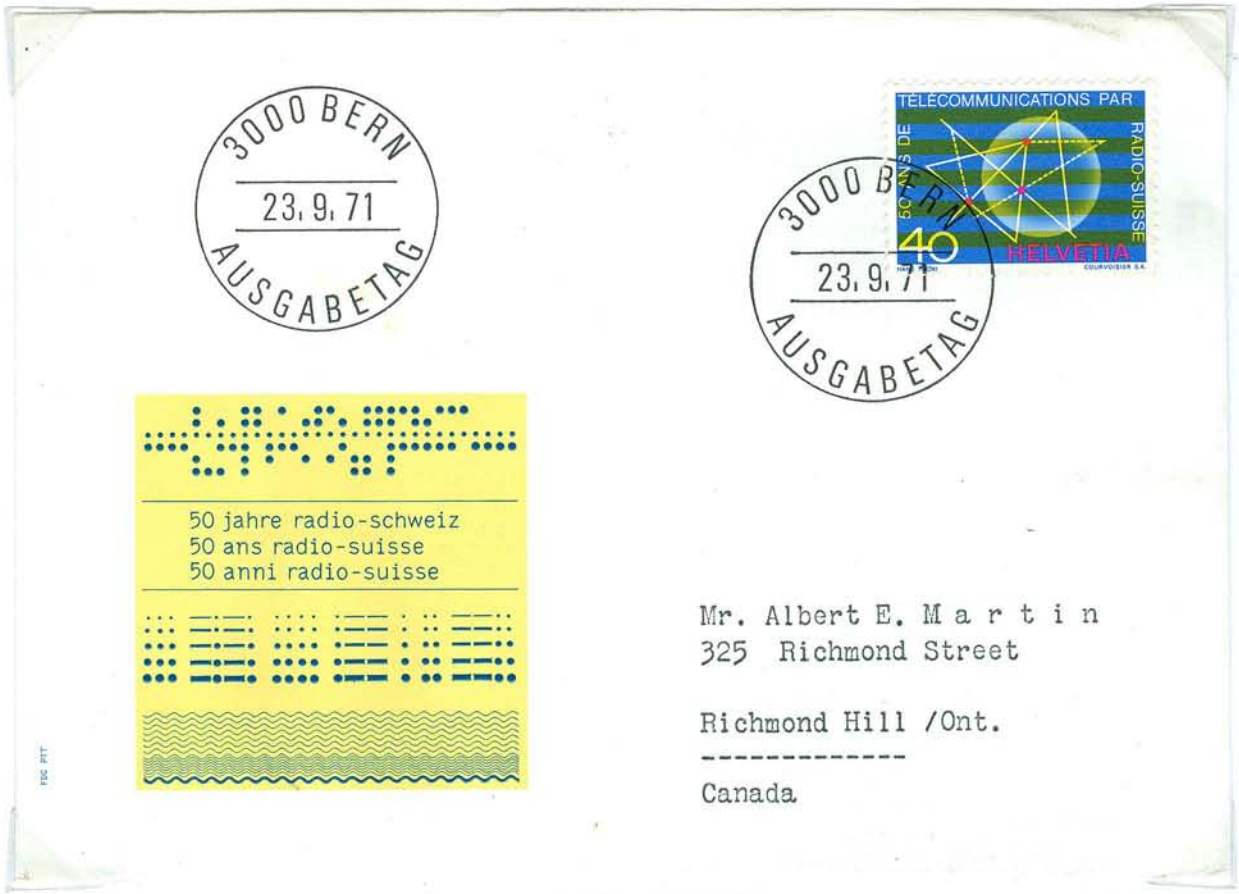
1931 The first national radio transmitters started with Radio Sottens for French and Radio Beromunster for German.

1933 Radio Monte Ceneri began as the national radio service for Italian.

1938 Romansh was recognized as the fourth national language. The Zurich studios broadcast Romansh programs between German transmissions.

1940 This Swiss postal cancellation from Geneva was promoting 'LA RADIO dans chaque foyer', or 'radio in every home'.

Top: On March 27, 1949, months before I was born in July, Wilfred Richards in Wiseton, Saskatchewan, heard the Swiss shortwave service on 25.39 m, or 11815 kHz, from the HEU 5 transmitter at Schwarzenburg. Bottom: This verification card arrived in the mail from Swiss Radio International to confirm my reception report for the broadcast I heard on November 12, 1980, on 9725 kHz. Switzerland was the third country I had confirmed.



The 50th anniversary of telecommunications by Swiss radio was celebrated in 1971 with a commemorative postage stamp. In 1972, the 50th anniversary of radio broadcasting in Switzerland also received philatelic recognition.

Swiss Radio International (SRI), the external shortwave service of Swiss broadcasting, celebrated its 50th anniversary in 1985 with a commemorative postage stamp of distinctive design. The anniversary and stamp were promoted on the 1985-86 program and frequency schedule of SRI, which was mailed to listeners worldwide.

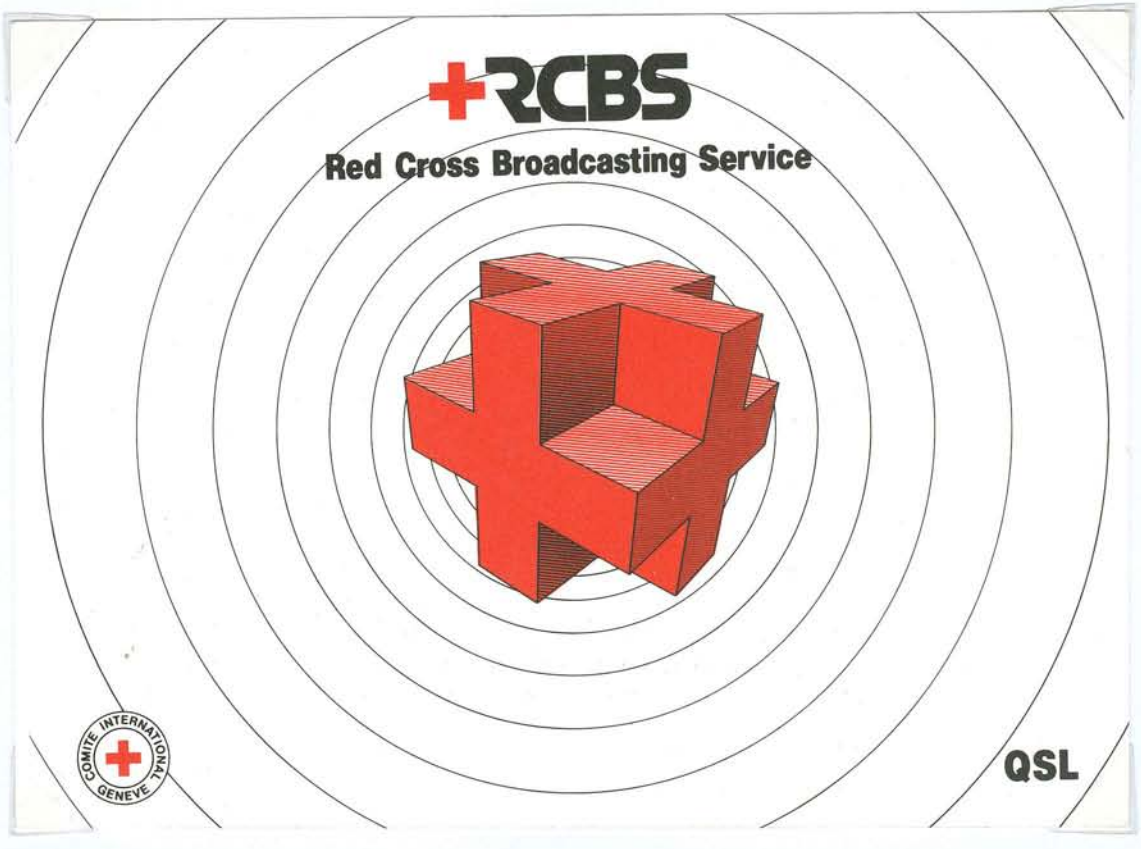
1945 The International Committee of the Red Cross (ICRC) began broadcasting.

1948 At the International Broadcasting Conference, in Mexico, the ICRC was granted its own frequency for humanitarian broadcasting.

1951 Test transmissions started on shortwave to find out if listeners in different parts of the world could hear the ICRC broadcasts.

1965 The ICRC installed its own studios at the Geneva headquarters, and formed the Red Cross Broadcasting Service.

1978 The Swiss PTT gave permission for the ICRC to broadcast once a month through the facilities of the PTT and Swiss Radio International (SRI) at Schwarzenburg and Beromunster.



In 1988, the 125th anniversary year of the International Committee of the Red Cross, this verification card arrived in the mail from Geneva to confirm my reception report of the ICRC broadcast I heard on February 1, 1987, at 0310 UTC on 9725 kHz.

SYRIA

When this verification card arrived in the mail from the Syrian Broadcasting and Television Service, it was the 115th country I'd confirmed. I heard Radio Damascus on December 10, 1985, at 2034 UTC on 12085 kHz.

I tuned in to an English program about Syrian history, followed by popular music. The news summary at the top of the hour was about the symposium on rewriting history, and the warning of the Secretary General of the United Nations about the situation in Lebanon. The broadcast times and frequencies after the news were followed by the mailing address for Radio Damascus and the national anthem. The station was off the air at 2100 UTC.

Dear Neil,

Your letter dated August 11th has just landed on my Table. Today, I was reading the news around seven oclock in the morning, and I jubilated at the idea that someone from as far off as Canada was able to pick our signal! it is great news for me. Thanks for the report, which was almost 100% accurate. Your receiver must be very powerful because there are some hearing with +

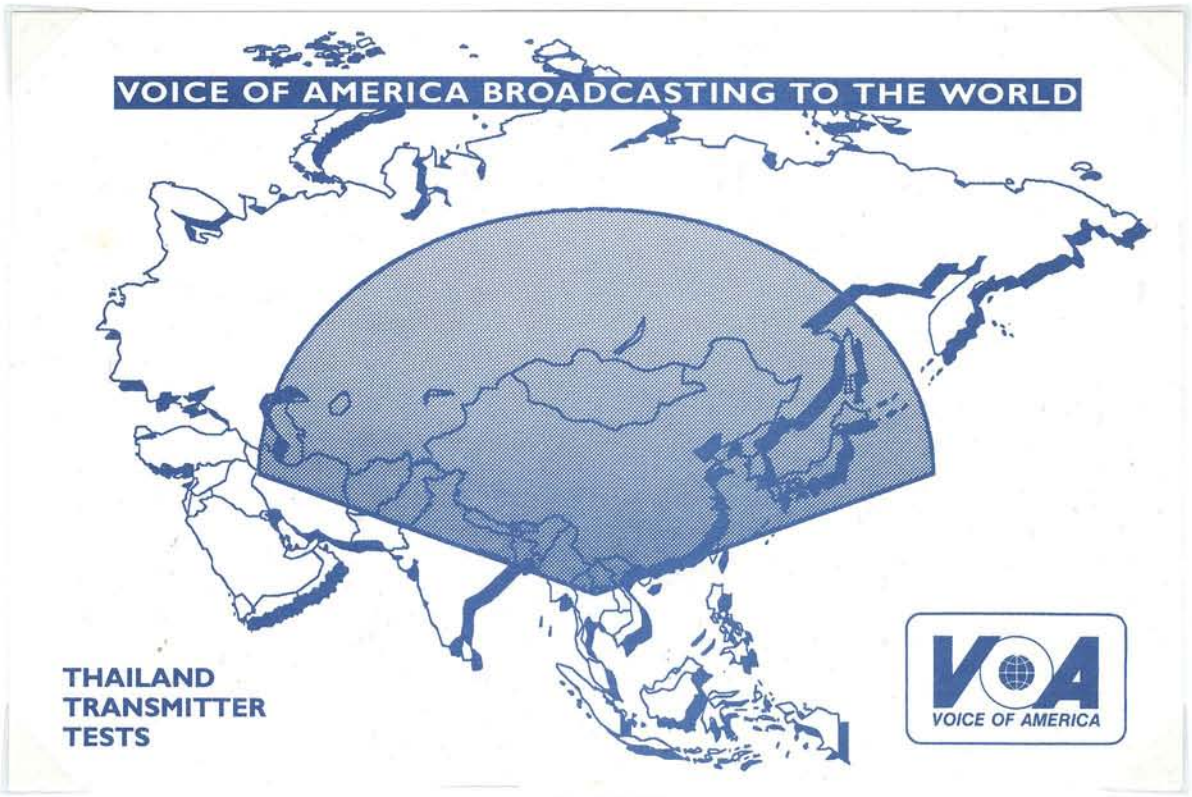
Radio Tanzania, Dar es Salaam, August 7, 1987, 0350 UTC, 9684 kHz

THAILAND

One Friday morning, at 8:36 a.m., I was surprised to hear a test transmission from the Thailand relay station of the Voice of America (VOA), at Udorn. It was 7:36 p.m. local time in Thailand.

Although the signal travelled about 12 920 km to reach me, and was naturally weak, it wasn't difficult to hear or copy all the details. I had tuned to an English language lesson about time, and its use in day to day living - borrowed time, overtime, valuable time. The announcers explained that Americans are bound to the clock, and many feel they're servants of the clock!

It was also a surprise to hear a program announcement and time check from the BBC's Hong Kong relay station, on the same frequency, before the musical interlude was over from the VOA's Thailand test transmission. Shortwave listening is always a great adventure.



This verification card arrived in the mail from Washington to confirm my reception report for the VOA broadcast I heard from Thailand on July 2, 1993, at 1236 UTC on 11820 kHz.

TOGO

On a cold, winter night in December, with the sounds of Africa in my headphones, I travelled by shortwave listening over time zones and mountains, and across an ocean. It was the first time I had heard a radio station in Togo.

I had listened before on other days, on the same frequency, but the signal was always too weak to clearly hear any details. This time I was busy writing program notes in my log book as the signal faded in with a popular music show, time checks, and station identifications. It was Radio Lome for sure on December 31, 1984, at 2049 UTC on 5047 kHz.

Dear Mr Carleton

QSL VERIFICATION:—

We wish to thank you for your report dated..16th March 86.. and are glad to verify your reception of our programmes on the following frequency:- KHz on the Medium Wave Band/ 3930 KHz in the 75 Metre Band.

We hope you will continue to receive and enjoy our programmes and we appreciate your comments.

Capital Radio, Umtata, Transkei, March 16, 1986, 0318 UTC, 3930 kHz

Radio Transkei was established on Independence Day, October 26, 1976. It operated a network of four FM transmitters providing coverage of the whole territory. The programs of Radio Transkei were mostly in Xhosa, and occasionally in English and other languages.

The first anniversary of Radio Transkei was celebrated in 1977 with two commemorative postage stamps that feature program announcers and studio views.

Radio Tunis, Sfax-Sidi Mansour, August 6, 1985, 1505 UTC, 11730, 15225 kHz

TURKEY

Regular external broadcasts from Turkey started on October 28, 1938. Today the Voice of Turkey is the international shortwave service of Turkish state radio. This verification card arrived in the mail from Ankara to confirm my reception report of the Voice of Turkey broadcast I heard in Ottawa on May 15, 1983, at 2200 GMT on 11740 kHz.

TUVALU

Radio listeners in Tuvalu, formerly the Ellice Islands in the South Pacific Ocean, can hear Radio Tuvalu, T2U2, from the island of Funafuti on 621 kHz. The station is heard by residents throughout the islands, as well as by fisherman at sea who receive messages from shore through the station's broadcasts in English and Tuvaluan. Radio Tuvalu also broadcasts from Funafuti on 100.1 MHz.

The Funafuti transmitting station is featured on a postage stamp that was issued in 1983 for World Communications Year. It shows the towers and A.M. antenna system of Radio Tuvalu rising above palm trees with the beach and ocean close by.

UGANDA

RADIO UGANDA,
P.O.Box 2038,
KAMPALA, UGANDA.

Ref: RU/ENG/95/2

18th January, 1985.

Neil Carleton,
P.O.Box 1644,
Almonte, Ontario,
K0A 1A0,
CANADA.

Dear Sir,

We recently received your interesting reception report dated 14th Nov. 1983 together with another one of 13th August 1984. I am sorry we did not receive the former report earlier, otherwise it would be our pleasure to send you a verification for it.

In fact the two reports are correct and you listened to our shortwave radio station, home service. This is a 20KW Thomson CSF transmitter on 5027 KHz during the evenings and night and 7196 KHz during the day. We use a short range log-periodic directional antenna beaming towards the north of the country as the transmitting station is in the south.

This station is to cover Uganda but shortwave being what it is people outside can receive the stray signals from the ionosphere and they can sometimes be strong especially

Although my first two letters in 1983 and 1984 must have gone astray, or were directed to the wrong address, this personal reply to my third letter arrived in the mail from Kampala to confirm that I had listened to Radio Uganda on November 11, 1983, at 0340 UTC, on 5027 kHz. The radio signal from Kampala had travelled about 11 330 km when I heard the broadcast at 10:40 p.m. in Ottawa.

Introduction

First Radio Broadcast

It was on December 24, 1906, that Reginald Aubrey Fessenden, a Canadian, made the first voice broadcast in history. He had alerted the ships of the United Fruit Company to stand by for a special message on Christmas Eve. Instead of hearing the dah-dit-dah-dit of Morse code, the wireless operators on ships along the coast were more than surprised at what they heard. From his location at Brant Rock, Massachusetts, Fessenden's short program included a musical recording and a bible reading. He played his violin, sang, and asked listeners to write.

Radio In The Mail

Since the early days of broadcasting, there has been a close relationship through the mail between radio stations and their audiences. Since the 1920s, listeners have been writing to radio stations with reception reports, program comments, questions, and requests. Radio stations have replied over the years with a variety of promotional items, ranging from verification of reception stamps to audience response cards.

On the mail of listeners and stations alike have been postage stamps, meter stamps, and postal cancellations that commemorate, or include in their design, radio stations and broadcasting services.

Other Collections For Sale

Listening To Radio A 92 page display collection of mounted postage stamps, meter stamps, radio license fee stamps, postal cancellations, advertising envelopes, verification of reception cards, and audience reply cards. Organized in 9 sections with explanatory / historical text.

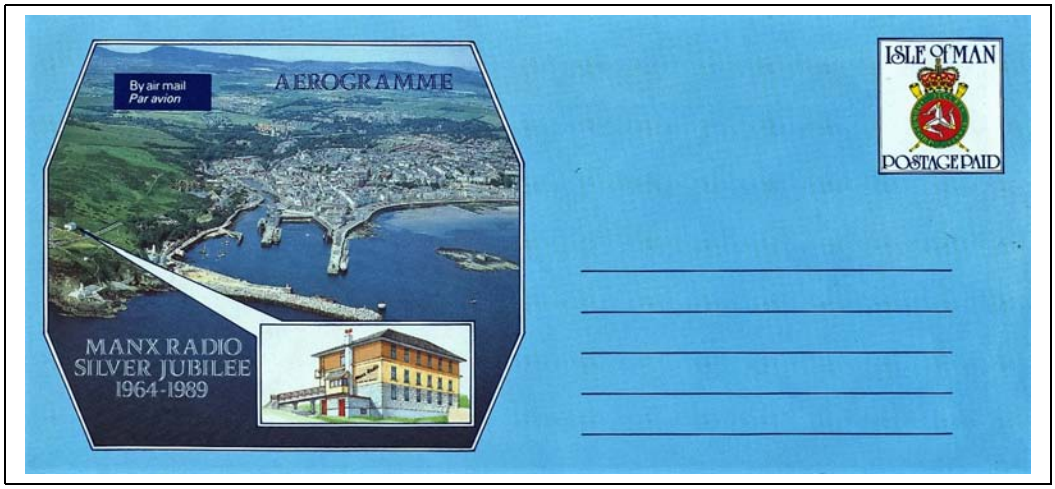
EKKO Broadcasting Station Stamp Album 106 page album from the EKKO Company of Chicago, 1924, with spaces for stamps from every broadcasting station in the United States and Canada. Contains 310 U.S + 32 Canada + 1 Mexico + 1 New Zealand = 344 EKKO stamps mounted with stamp hinges.

Verification of Reception Stamps 5 pages of 29 mounted certified reception / verification / program / confirmed reception / reception verified / and other station stamps + a reception verified card with stamp. Accompanied by 6 photocopied magazine articles 1925 - 1997 explaining / illustrating the history of EKKO stamps.

Adventist World Radio QSL Stamps individual stamps, full sheets, proof plates (only known surviving samples), QSL certificates, and 1986-96 correspondence with AWR personnel about the history of the organization's QSL stamps.

Radio In The Mail
Content Examples and Glossary

Radio In The Mail includes a variety of philatelic items on the topic of radio stations and broadcasting services. This collection also has printed material produced by radio stations for mail delivery to listeners around the globe.



2 aerograms

Postage-paid air letter sheet with gummed flaps that is written on and then folded to form an envelope.

Isle of Man + Vatican

14 audience reply cards

Promotional card, typically of similar size and material as a postcard, with an illustration or photo on one side, produced by a radio station to reply to a listener.

Argentina + Canada + Belgium + Finland + India + Japan + Morocco + Sri Lanka

67 commemorative cancellations

Postal marking, with promotional topic or commemorative event lettering and illustration, applied on a postage stamp or postal stationery to prevent its reuse.

Australia + Austria + Canada + China + Cuba + Czechoslovakia + Ecuador + England + France + French Polynesia + Germany Berlin + Germany Republic + India + Japan + Monaco + Netherlands + Netherlands Antilles + Norway + Russia + Scotland + Spain + Sweden + Switzerland + Transkei + Uruguay + Vatican + Yugoslavia

71 covers

Postally used envelope.

Argentina + Ascension + Bolivia + Canada + China Republic + China People's Republic + Costa Rica + Cuba + Czechoslovakia + Dominican Republic + Ecuador + El Salvador + England + Iceland + India + Indonesia

+ Ireland + Kuwait + Latvia + Liberia + Lithuania + Malta + Monaco + Netherlands Antilles + Pakistan + Peru + Poland + Romania + Russia + St. Helena + Seychelles + Spain + Sweden + Switzerland + Transkei + Turkey + United States of America + Uzbekistan + Vatican + Yemen + Yugoslavia

78 first day covers

Cover bearing one or more postage stamps or imprinted stamps with a first day of issue cancellation, typically pictorial.

Australia + Austria + Belgium + Brazil + Canada + China Republic + Cuba + Cyprus Turkish Republic of Northern Cyprus + Czechoslovakia + Denmark + Ecuador + Germany Berlin + Germany Democratic Republic + Germany Federal Republic + Gibraltar + India + Ireland + Isle of Man + Israel + Japan + Jersey + Lesotho + Netherlands + Netherlands Antilles + Norway + Pakistan + Russia + St. Helena + Scotland + Sweden + Switzerland + Transkei + United States of America + Uruguay + Vatican + Yugoslavia

2 local post stamps

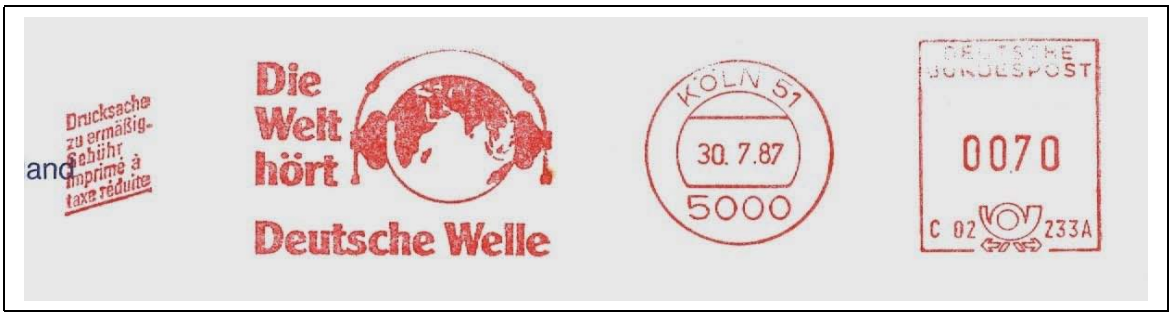
Privately-produced stamp for postal service within a limited geographical area.

Russia + Sweden

3 maximum cards

Postcard of a stamp with the postage stamp affixed to the image side of the card, accompanied by a cancellation.

Australia + Canada



141 meter stamps

Prepaid postage impression made by a postage meter machine.

Australia + Austria + Belgium + Brazil + Canada + Costa Rica + Croatia + Denmark + England + Germany Democratic Republic + Germany Federal Republic + Greenland + Israel + Italy + Japan + Jordan + Luxembourg + Korea Republic + Netherlands + Nigeria + Norway + Poland + Portugal + Spain + Sweden + United Arab Emirates + United States of America + Vatican + Yugoslavia

3 philatelic bulletins

Printed information from a postal service about the issue of a postage stamp, typically with an illustration and print details.

Canada + Costa Rica + Pakistan

6 postage paid impressions

Prepaid postage impression without date and/or denomination made with a hand stamp or by machine.

Australia + Germany Federal Republic + New Zealand

156 postage stamps

Officially issued postage label for display on an item of mail as evidence of payment of postage, typically with a national designation and a denomination on the front, and an adhesive gum or self-adhesive backing.

Afars and Issas + Algeria + Andorra + Anguilla + Argentina + Ascension + Australia + Austria + Brazil + Bolivia + Canada + Chile + China Republic + Columbia + Comoros + Congo Democratic Republic + Costa Rica + Denmark + Egypt + El Salvador + Fiji + Finland + French Polynesia + Gambia + Germany Berlin + Ghana + Guatemala + Honduras + Hungary + Indonesia + Isle of Man + Japan + Korea Republic + Newfoundland + Liberia + Luxembourg + Macedonia + Mexico + Monaco + Mongolia + Montserrat + Nauru + Netherlands + Nevis + Niger + Norfolk Island + Papua New Guinea + Peru + Poland + Russia + St. Kitts + Saudi Arabia + Seychelles + Solomon Islands + South Africa + Spanish Sahara + Transkei + Tuvalu + Uruguay + Vatican + Vietnam Democratic Republic + Wallis and Futana

50 items of postal stationery

Stationery, such as an envelope or postal card, with an imprinted postage stamp or inscription indicating that postage has been paid.

Belarus + China People's Republic + Cyprus Turkish Republic of Northern Cyprus + Hungary + Ireland + Japan + Korea Republic + Poland + Romania + Russia + Slovakia

11 postal tax stamps

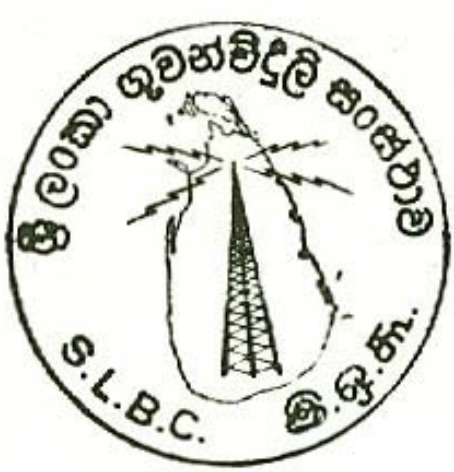
Mandatory use postage stamp issued to raise revenues for a charity or a war related project.

Bolivia

64 postcards

Card for sending a message by mail without an envelope, typically having a photograph or other illustration on one side.

Canada + Czechoslovakia + Dominican Republic + England + Finland + Germany Berlin + Germany Federal Republic + Gibraltar + Japan + Kenya + Netherlands + Poland + Sweden + United States of America + Vatican



19 radio station / broadcasting service handstamps

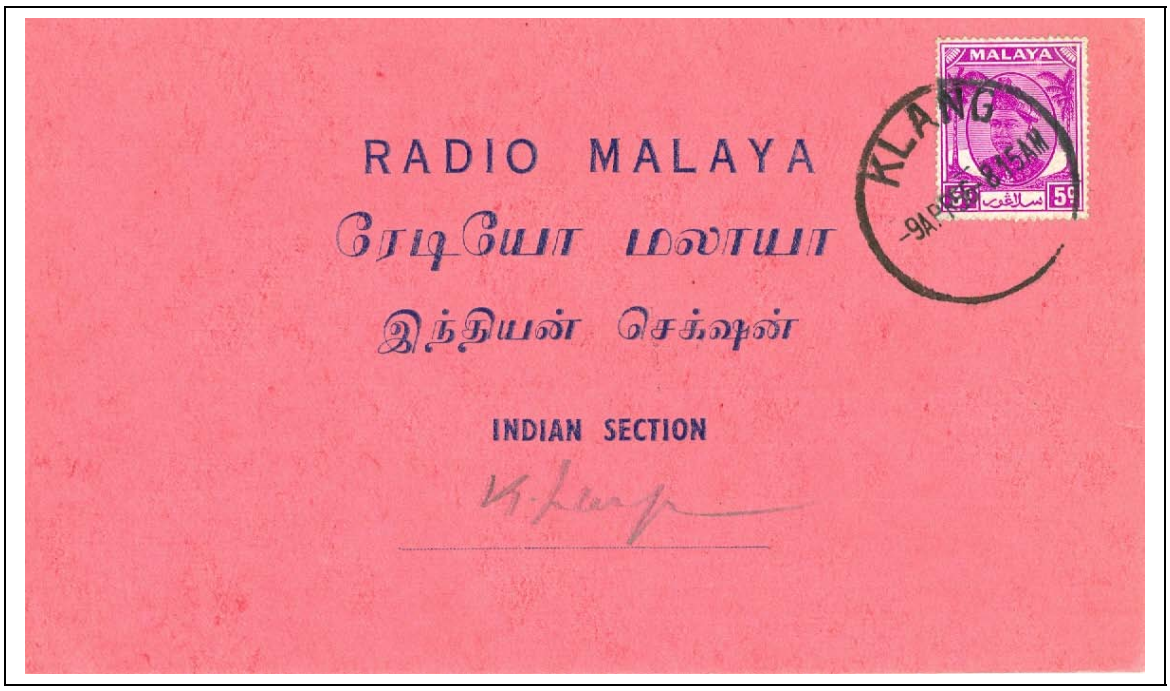
Identification marking made by a handstamp, such as the station name / slogan / logo/ language service, etc., on a postal cover or verification of reception card.

Argentina + Cameroon + Chad + China Republic + Guatemala + Hong Kong + Ireland + Ivory Coast + Netherlands + Netherlands Antilles + Nicaragua + Seychelles + Sri Lanka + Vatican

23 radio station promotion stamps

Stamp-like adhesive label with station name / slogan / anniversary / etc.

Czechoslovakia + Netherlands + Poland + Sweden + United States of America



1 radio station request card

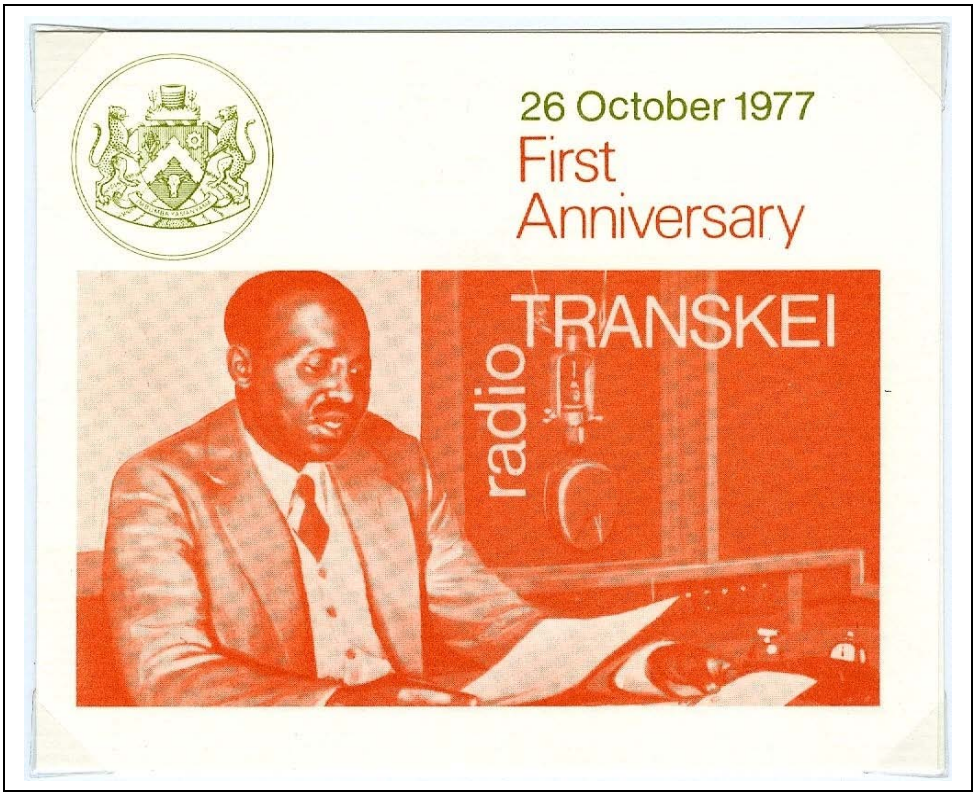
Postcard format produced by a radio station for listeners to write with a program request.

Malaysia

3 semi-postal stamps

Voluntary use postage stamp issued to raise money, such as a charitable cause, typically with two denominations separated by a plus sign.

Brazil + Bulgaria



2 souvenir cards

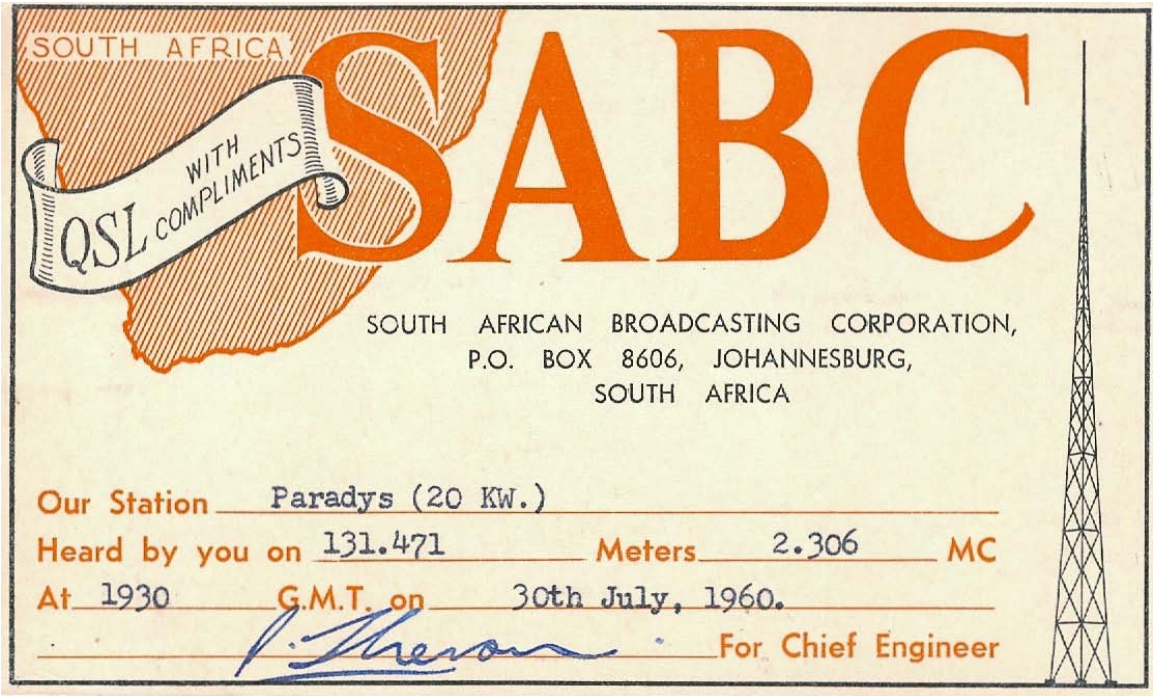
Philatelic card, including a postage stamp or image with description and history, produced in conjunction with the issue of a stamp.

China Republic + Transkei

4 special delivery stamps

Expedited service postage stamp for the accelerated delivery of urgent mail.

Vatican



244 verification of reception cards (QSL card)

Card, typically of similar size and material as a postcard, produced by a radio station to confirm a listener's reception report. The confirmation may include full data (date, time, frequency of the reported broadcast), partial data, or no data. QSL card is derived from the amateur radio Q code 'QSL' meaning either "Do you confirm receipt of my transmission?" or "I confirm receipt of your transmission".

Afghanistan + Albania + Algeria + Andorra + Angola + Antigua + Argentina + Armenia + Ascension + Australia + Austria + Bangladesh + Belgium + Belize + Benin + Brazil + British Bechuanaland Protectorate + Bulgaria + Canada + Canary Islands + Central Africa + Ceylon + Chad + China Republic China People's Republic + Congo Democratic Republic + Costa Rica + Cuba + Croatia + Cyprus + Denmark + Dominican Republic + Ecuador + Egypt + England + Equatorial Guinea + Falkland Islands + Finland + French Equatorial Africa + French Guyana + French Polynesia + Gabon + Germany Democratic Republic + Germany Federal Republic + Greece + Greenland + Guam + Guatemala + Haiti + Honduras + Hungary + Iceland + India + Indonesia + Iran + Iraq + Ireland + Israel + Italy + Jamaica + Japan + Jordan + Kazakhstan + Korea Republic + Korea People's Republic + Kuwait + Lebanon + Lesotho + Liberia + Lithuania + Luxembourg + Madagascar + Mali + Malta + Monaco + Mongolia + Montserrat + Morocco + Namibia + Netherlands + Netherlands Antilles + New Caledonia + New Zealand + Niger + Northern Mariana Islands + Norway + Oman + Pakistan + Panama + Palau + Philippines + Poland + Portugal + Qatar + Romania + Russia + St. Helena + Singapore + Senegal + Seychelles + Serra Leone + Solomon Islands + South Africa + Spain + Sri Lanka + Sweden + Switzerland + Syria + Thailand + Togo + Turkey + Ukraine + United Arab Emirates + United States of America + Uzbekistan + Vatican + Vietnam Socialist Republic + Yugoslavia + Zambia
