- 515 **#MR4 1918 Bahamas Special Delivery Admiral Cover to Nassau**. Franked with 2c Admiral War Tax and 5d Bahamas Special Delivery overprint, respectively tied by Toronto ??JUN.1918 c.d.s. and Nassau 06.JUL.1918 c.d.s. This is the rare use of the 'E' obliterator with the Montreal 'WY' dater hub showing the wide '1897' and smaller top in the 'A' of Montreal, that were only used together from January 23-28. Now considered to be one of Canada's flag cancel hidden rarities due to this short 6 day use, it has a 2008 Langford catalogue value of U\$400 on cover. Lot has photocopies of the 1-6 flag cancel used on January 22 & 29 with the 'UZ' dater hub, thus confirming the short January 23-28 period of use for the "WY" dater hub. Cover reduced about 9 mm at right from opening, but not into stamp or cancel and is otherwise fine to very fine.

The Jim Miller ORB Collection

This is the most comprehensive collection of these ever formed. Each hammer has been assigned a catalogue number, like 2-01 which means "Two ring, OTTAWA hammer 1". Orbs come in two and three ring formats. Only steel hammer types are included. Each lot includes a data sheet which describes the size and shape particulars of the hammer, known ERD and LRD, timemarks known, reported years of usage, indicia errors, general comments, known reporters, and the last date in which updates were made to the data sheets. This information is very valuable to each lot.

Jim has collected the orb cancels for many years going back to the late 1970's. Jim wrote an article for BNAPS Topics which appeared in the July-August 1989 issue describing the orbs along with an interesting proposal that the orb cancels were the true precursors to the squared circle postmarks. This proposal became part of the BNAPS squared circle study group newsletter and for some ten years Jim wrote a series of articles for each known hammer. A copy of each data sheet accompanies each lot.

Jim collected only fully dated strikes, thus you will find many lovely strikes. On the more common hammers, Jim calendar dated them, thus many dates have two or more different timemarks for a common date. Inverted and unusual indicia are identified. This collection was put together over many years, emphasizing the orb postmark, thus stamp and cover condition were not factors. The covers have ordinary franking and often will have aging faults as Jim collected them for the orb postmarks, not condition or any specialty nature of the covers. Same with the stamps, faults should be expected.

The following 54 lots form the collection.

- 616 **/PC Orbs 1 2-01 OTTAWA/CANADA 2-Ring Orb Collection**, consisting of 39 stamps and 12 covers/cards, 23/MR 27/24 to 14/DE 13/30. Lot includes a data sheet for 2-02 of which there is only one known example (photocopy).

This is the only orb post mark that is 'unofficial', having been made by altering a former duplex Lee #DUN-148 or Cloutier #DUN-148. 30 examples of the unofficial duplex on stamps are also included with this collection. Orb dates range 15/JAN 16/02 to 13/DEC 18/03. This hammer was used primarily for nonstandard mail, such as oversize covers and parcels. While the collection includes a fair number of stamps, the cover collection is sparse, and this post mark should be in the 'scarce' category.

- 723** ☒ **War Correspondence Between South Africa and Sault Ste Marie, Ontario, 1902 to 1914**, all referring to the search for a Canadian soldier (who eventually went missing) in Transvaal, Mr. Denis Willoughby Baker. These were either sent to, or from Johannesburg or Sault Ste Marie, or Ottawa (these are free franked with keyhole-style datestamps on OHMS stationery envelopes). A letter dated 1910 is on mourning government stationery from Department of Militia and Defense to the mother in Sault Ste Marie announcing "Militia land Warrant N. 6535 was issued to Dennis W. Baker for service in the South African Constabulary. His address at the time was ... Transvaal, South Africa". A letter from Mr. Baker to his mother (the last one, we believe) is dated 1910 and says in part "have been away in Portuguese East Africa and up the Zambesi River...". The mother apparently then lost touch with her son, inquired as to his whereabouts and many letters follow (included in this lot), one of which we have scanned online. It would seem that by the last letter in 1914 they were still looking for him. There are 8 envelopes with contents plus another 25 or so letters without envelopes, some personal, some official. There are serious condition problems, mostly with the envelopes, but pretty much all the contents and letters are easily readable, not to say fascinating.
